strickland tracks

### 1.1.2 Installation of Ball-Born Track System

Strickland Tracks Ltd offer a wide range of ball on track systems which assemble on to the machine via ball on mounting plates, mating to opposing plates on the front chassis. The image below shows a typical ball on track system with mounting plates.

In most cases where mounting plates are adopted, there is need to reduce the drive housing section. Due to the reduction of strength this causes, the drive housing must be connected to the chassis using a substantial bracket, typically shown in the above image.

When considering the design of bracket, always ensure slots are not used in the horizontal plane, this will ensure drive housing is braced correctly, and guarantee drive rigidity.
