Textbook of Mental Health Nursing Vol I E Book *7 Books That Rocked the Church* Daniel A Crane, 2021-12-14 7 Books That Rocked the Church by Daniel Crane explores controversial books throughout history that the Christian church has famously disavowed and asks the question Why Engagingly written and thoughtfully researched this book explores what the fuss was all about with books ranging in date from the second century after Christ to more contemporary authors Books by Karl Marx Charles Darwin Galileo Galilei and many others profoundly upset the church by calling into question foundational Christian doctrines or beliefs Most of the books discussed here were banned at some time by Christian authorities The author's aim is to challenge Christians to respond critically but open mindedly to books that oppose a Christian worldview Readers of 7 Books That Rocked the Church will come away better equipped to answer the charge that the church is intolerant of competing ideas They will also develop the ability to interact with new and possibly dangerous ideas that comport with Jesus' admonition to be wise as serpents but gentle as doves This book also includes discussion questions for further study

Self, Logic, and Figurative Thinking Harwood Fisher, 2008-12-31

Harwood Fisher argues against neuroscientific and cognitive scientific explanations of mental states for they fail to account for the gaps between actions in the brain cognitive operations linguistic mapping and an individual's account of experience Fisher probes a rich array of thought from the primitive and the dream to the artistic figure of speech and extending to the scientific metaphor He draws on first person methodologies to restore the conscious self to a primary function in the generation of figurative thinking How does the individual originate and organize terms and ideas How can we differentiate between different types of thought and account for their origins Fisher depicts the self as mediator between trope and logical form Conversely he explicates the creation and articulation of the self through interplay between logic and icon Fisher explains how the I can step out of scripted roles The self is neither a discursive agent of postmodern linguistics nor a socially determined entity Rather it is a historically situated dynamically constituted place at the crossroads of conscious agency and unconscious actions and evolving contextual logics and figures
