Emile Biémont

Histoire De L'arc-en-ciel:

A History of Spectroscopy Emile Biémont, 2025-11-28 Understanding the nature of light is a fundamental question that has troubled mankind since antiquity. It took a great deal of speculation and study concerning the formation of the rainbow to formulate the right hypotheses to explain the iridescence observed when white light passes through raindrops or pieces of glass. For a long time, ancient philosophers were far more interested in the propagation of the light than in its nature. A History of Spectroscopy retraces the major stages in the growth of the various spectroscopic methods from their origins as well as the most recent advances and the hopes they raise for future technological progress. With its multidisciplinary aspects, it embodies a masterly and unique effort which has no equivalent in the published literature. The present contribution will be read with profit not only by students embarking on a career in physics in general and in spectroscopy or astrophysics more specifically, but also by students in many other related fields like chemistry, biology, medicine, pharmacy, and engineering.

Key Features: The most extensive and detailed book on the history of spectroscopy. Covers a period of several centuries extending from Newton up to the present day. Discusses recent progress in different fields and subfields of physics and more specifically in the domain of the analysis of the light.

L'Arc-en-ciel, 2000, Deleuze, Guattari and the Schizoanalysis of Postmedia. Joff P. N. Bradley, Alex Taek-Gwang Lee, Manoj N.Y., 2023-01-12. Is the self or subject discontinuous across technological platforms? Do technological developments increase inequality and exploitation? Is the new media landscape creating a dangerous distraction from the climate crisis? Connecting the work of critical postmedia studies to Deleuze and Guattari's concept of schizoanalysis, this book marks a bifurcatory shift in the radical theory on technology. A range of critical perspectives are explored by international authors who engage with ecology, ecosophy, climate change, the postmedia condition, and the Anthropocene. Answering the above questions, editors Joff P. N. Bradley, Alex Taek Gwang Lee, and Manoj N. Y. frame the volume's chapters as urgent responses to unbridled technological advance and impending climate disaster. Using ecological philosophy as a core focus, the volume analyses new media technologies of the self, the power of algorithms and technologies of resistance to outline a materialist paradigm capable of addressing crises across the cultural, biological, and informational spheres. Through contesting economies built on desire and destruction and questioning the infiltration of capitalism in all of its spheres of negative influence, the editors review recent technological developments in light of Deleuze and Guattari's earlier seminal theories to make bold new connections and critiques in the study of media philosophy and the environment.

Oşumare : Le chant de l'arc-en-ciel - The song of the rainbow Thony Babarinde, 2022-05-23. Par son héritage africain yoruba, Thony Babarinde nous propose une fois encore un voyage humain et naturel, ainsi qu'un chant d'espoir pour notre Terre. La rencontre des peuples, tel l'arc-en-ciel qui réunit des couleurs et nous connecte la Terre dont nous sommes tous les enfants. De l'Afrique, la Scandinavie, passant par l'Amérique et l'Australie, Thony Babarinde nous invite à une découverte culturelle et sociale tout en chantant l'espoir et usant de la poésie comme un tambour.
