

Key features of a hybrid bike

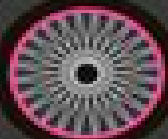

The hybrid bike is a true do-it-all machine that combines the versatility and easy handling of mountain bikes with the pace and lightness of the road. Here are the key features to look out for.

A hybrid bike features a lightweight aluminum **frame** and the geometry puts the rider in a comfortable position.

Hybrid bikes are equipped with flat, wide **handlebars** with soft grips, allowing the rider to keep their body more upright.

Hybrid bikes typically have wide and soft **tires** which foster great control, no matter the terrain.

In the interest of comfort, most hybrid bikes have increased **suspension** in the front fork, better absorbing any lumps and bumps.

Rim **brakes** are common on hybrids, providing good control and reliability whether on the beach, street or trail.

Hybrid bikes are designed to accommodate racks and fenders so you can carry a picnic, work clothes or groceries.
