Evans,2014-11-27 Schooling

Corporate Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years Based in extensive archival research it traces the origins and

development of accountability reform as marked by key government and business led reports from A Nation at Risk to No Child Left Behind and Race to the Top By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools Evans shows how reformers have applied principles of business management to schools in extreme ways damaging civic education and undermining democratic learning The first full length narrative account of accountability reform and its impact on social studies and civic education Schooling Corporate Citizens offers crucial insights to the ongoing process of American school reform shedding light on its dilemmas and possibilities and allowing for thoughtful consideration of future reform efforts *The Three Ages of Government* Jos C.N.

Raadschelders,2020-11-05 It is only in the last 250 years that ordinary people in some parts of the world have become citizens rather than subjects This change happened in a very short period between 1780 and 1820 a result of the foundations of democracy laid in the age of revolutions A century later local governments embraced this shift due to rapid industrialization urbanization and population growth During the twentieth century all democratic governments began to perform a range of tasks functions and services that had no historical precedent In the thirty years following the Second World War Western democracies created welfare states that for the first time in history significantly reduced the gap between the wealthy and everyone else Many of the reforms of that postwar period have been since rolled back because of the belief that government should be more like a business Jos C N Raadschelders provides the information that all citizens should have about their connections to government why there is a government what it does how it does it and why we can no longer do without it The Three Ages of Government rises above stereotypical thinking to show the centrality of government in human life **Political Animals** Rick Shenkman,2016-01-05 Can a football game affect the outcome of an election What about shark attacks Or a drought In a rational world the answer of course would be no But as bestselling historian Rick Shenkman explains in Political Animals our world is anything but rational Drawing on science politics and history Shenkman explores the hidden forces behind our often illogical choices Political Animals challenges us to go beyond the headlines which often focus on what politicians do or say they ll do and to concentrate instead on what s really important what shapes our response Shenkman argues that contrary to what we tell ourselves it s our instincts rather than arguments appealing to reason that usually prevail Pop culture tells us we can trust our instincts but science is proving that when it comes to politics our Stone Age brain often malfunctions misfires and leads us astray Fortunately we can learn to make our instincts work in our favor Shenkman takes readers on a whirlwind tour of laboratories where scientists are exploring how sea slugs remember chimpanzees practice deception and patients whose brains have been split in two tell stories The scientists findings give us new ways of understanding our history and ourselves and prove we don t have to be prisoners of our evolutionary past In this engaging illuminating and often riotous chronicle of our political culture Shenkman probes the depths of the human mind to explore how we can become more political and less animal *Teaching America* David J.

Feith,2011-08-11 In *Teaching America* more than 20 leading thinkers sound the alarm over a crisis in citizenship and lay out a powerful agenda for reform The book s unprecedented roster of authors includes Justice Sandra Day O Connor Senator Jon Kyl Senator Bob Graham Secretary Rod Paige Alan Dershowitz Juan Williams Glenn Reynolds Michael Kazin Frederick Hess Andrew Rotherham Mike Feinberg Seth Andrew Mark Bauerlein and more Their message To remain America our country has to give its kids a civic identity an understanding of our constitutional system and some appreciation of the amazing achievements of American self government But we are failing Young Americans know little about the Bill of Rights the democratic process or the civil rights movement Three of every four high school seniors aren t proficient in civics nine of ten can t cut it in U S history and the problem is only aggravated by universities disregard for civic education Such civic illiteracy weakens our common culture disenfranchises would be voters and helps poison our politics *Stakeholder Engagement*

Aimee L. Franklin,2020-06-18 This book analyses the relationship between stakeholder engagement practices and organizational sustainability across sectors and disciplines It illuminates the relationships between the inputs and processes vital for all kinds of organizations to engage stakeholders Then it describes the mutually valued outcomes that can produce broader organizational impacts and sustainability Each chapter is structured around a logic model that provides an analytical framework to engage the reader in strategic analysis and offer practical applications for adaptation and implementation in any organization The book encourages the reader to systematically consider the descriptive instrumental and normative aspects of stakeholder theory as a precursor to designing stakeholder engagement practices *Knowledge Games* Karen

Schrier,2016-06-15 Are games the knowledge producers of the future Imagine if new knowledge and insights came not just from research centers think tanks and universities but also from games of all things Video games have been viewed as causing social problems but what if they actually helped solve them This question drives Karen Schrier s *Knowledge Games* which seeks to uncover the potentials and pitfalls of using games to make discoveries solve real world problems and better understand our world For example so called knowledge games such as Foldit a protein folding puzzle game SchoolLife which crowdsources bullying interventions and Reverse the Odds in which mobile game players analyze breast cancer data are already being used by researchers to gain scientific psychological and humanistic insights Schrier argues that knowledge games are potentially powerful because of their ability to motivate a crowd of problem solvers within a dynamic system while also tapping into the innovative data processing and computational abilities of games In the near future Schrier asserts knowledge games may be created to understand and predict voting behavior climate concerns historical perspectives online harassment susceptibility to depression or optimal advertising strategies among other things In addition to investigating the intersection of games problem solving and crowdsourcing Schrier examines what happens when knowledge emerges from games and game players rather than scientists professionals and researchers This accessible book also critiques the limits and implications of games and considers how they may redefine what it means to produce knowledge to play to educate and

to be a citizen **Social Media for Civic Education** Amy L. Chapman, 2022-10-17 This open access book provides the theoretical and pedagogical foundations for a promising new approach to civic education using social media to teach civics While many measures indicate that youth civic engagement has long been in decline many of these measures fail to take into account all of the ways that youth can interact with civic life One of these understudied ways is through social media including platforms like Twitter where young people have the opportunity to encounter the news engage with people in power and bring attention to the needs in their community Throughout this volume Chapman explores how and why teachers can use social media to teach civics as well as how it might meet the needs of students in ways other approaches do not

Civic Education in the Twenty-First Century Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville's analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America's educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters Toward Community-Based Learning, 2020-01-29 Toward Community Based Learning contends that the ideal school offers the opportunity to understand reality in a way that connects teaching and education with conditions in the surrounding community and the student's life and concerns This view holds that problem solving requires an understanding and awareness of the whole which can be achieved

through direct activities In this manner learning is linked to its natural context with ideal instruction being actively problem oriented holistic and life centered This thought provoking volume offers an essential and comprehensive picture of community based learning in the field of education The book deals with the history of community based learning as well as its present applications including its global successes and difficulties The authors provide numerous pedagogical approaches that are designed to meet the challenges of contemporary education They show how learning is connected with authentic community environments in which students can gain new understandings through solving emerging problems They also demonstrate how teachers can make learning more functional and holistic so that students have the ability to work in new situations within the complex world around them School specific descriptions reveal how teachers and their students have implemented community based projects in the U S A India and China at different times Contributors are Thomas L Alsbury Mary Ewans Linda Hargreaves Susan K Johnsen Eija Kimonen Susan Kobashigawa Karon N LeCompte Suzanne M Nesmith Raimo Nevalainen and Lakia M Scott

The Rhetoric of Supreme Court Women Nichola D. Gutgold, 2012-05-31 The Supreme Court is one of the most traditional institutions in America that has been an exclusively male domain for almost two hundred years From 1981 to 2010 four women were appointed to the Supreme Court for the first time in U S history The Rhetoric of Supreme Court Women From Obstacles to Options by Nichola D Gutgold analyzes the rhetoric of the first four women elected to the Supreme Court Sandra Day O Connor Ruth Bader Ginsburg Sonia Sotomayor and Elena Kagan Gutgold s thorough exploration of these pioneering women s rhetorical strategies includes confirmation hearings primary scripts of their written opinions invited public lectures speeches and personal interviews with Justices O Connor Ginsburg and Sotomayor These illuminating documents and interviews form rhetorical biographies of the first four women of the Supreme Court shedding new light on the rise of political women in the American judiciary and the efficacy of their rhetoric in a historically male dominated political system Gutgold s *The Rhetoric of Supreme Court Women* provides valuable insight into political communication and the changing gender zeitgeist in American politics

Handbook of Research on Solutions for Equity and Social Justice in Education Etim, James, Etim, Alice, 2023-03-02 Education s role should further social justice prepare students to compete for

higher social positions train workers and engage students so that they become active participants in a democratic society. However, as with many global systems, education has long ago fallen victim to the institutional ailments of systematic oppression and discrimination. In order to promote equity and social justice in education, it is paramount that educators and administrators acknowledge systematic challenges in education and the solutions. The Handbook of Research on Solutions for Equity and Social Justice in Education discusses how teachers and school administrators practice equity and inclusion in their schools. It provides examples of social justice and how it affects society as well as specific case studies that aim at engendering equity and inclusion for minorities. It further discusses these issues in a global context. Covering topics such as agentic empowerment, social justice in dialogue, and teacher social justice advocacy, this major reference work is a critical resource for faculty and administrators of both K-12 and higher education, preservice teachers, teacher educators, school social workers, and counselors, librarians, government officials, researchers, and academicians. America's State Governments Jennifer Bachner, Benjamin Ginsberg, 2020-07-23. This timely and important new work takes a critical look at government in the American states and illustrates the disconnect between state government institutions and their constituents. The text illuminates three basic political problems of state governments: weak constitutional and institutional foundations, a lack of civic engagement, and long histories of unchecked public corruption. In addition, the book explains why some states did and others did not respond promptly to the COVID-19 pandemic and examines America's long-standing problem of police and prosecutorial misconduct, providing a context for understanding the demonstrations and protests that rocked American cities in the summer of 2020. For students and citizens of state politics, the book concludes with a proposal aimed at civic literacy and action. *The Politics of Civic Education* Eleni M. Mantas-Kourounis, 2024-06-10. This book chronicles the progression of civic education advocacy since the early 2000s. It identifies the main actors that called for civic education reform, describes their motivations and policy platforms, and documents the path taken to capture state policy agendas. It argues that No Child Left Behind incentivized civic education advocates to mobilize a call to action to restore emphasis on civics that materialized into national policy reform proposals that successfully captured the agendas of state legislatures and bureaucracies. This book analyzes the implementation and sustainability of these civic education policy reforms by undertaking a comparative case study analysis of school districts in Utah and Connecticut. Through the voices of teachers and district administrators, the book tells the story of what happened when these state policy reforms inspired by national initiatives hit the local level where the rubber meets the road. As ideological debates about schools and democracy unfold across the country as civic education advocates and proposals proliferate, this book treats civic education not as a panacea but as a concrete policy area to be analyzed and understood. It contextualizes the current debate and offers a critical assessment of the most recent comprehensive state-level civic education policy reform. It argues that while questions linger about what type of civic-inspired educational interventions remains most effective for whom, where, and why, the

implementation of such interventions are profoundly impacted by local actors and local politics and that future initiatives should take this dimension into consideration
