Assessing Student Outcomes - Why, Who, What, How? J. Fredericks Volkwein,2011-11-22 This volume offers administrators and practitioners a summary guide to assessment in higher education from the reasons for undertaking assessment to the delivery of findings It opens with the questions that precede an effective study and drive research design To what extent is the study aimed at educational improvement and to what extent is it aimed at external accountability Are the results expected to demonstrate goal attainment improvement comparison to others meeting standards cost effective investment What is the population from whom assessment data are being collected Are we measuring the knowledge and skills of individuals and making decisions about their remediation certification or development Or are we sampling from particular groups of students and comparing them to each other or perhaps to themselves over time The core of the volume is devoted to the objects of assessment basic skills general education knowledge attainment in the major personal growth attitudes and satisfaction and alumni outcomes keeping in mind both cognitive and noncognitive measures One chapter describes common obstacles to effective assessment others describe conceptual models research methods and data collection strategies and instruments The concluding chapter underscores the importance of communicating research results effectively This is a special volume of the Jossey Bass higher education quarterly report series New Directions for Institutional Research Always timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management *Test Equating, Scaling, and Linking* Michael J. Kolen,Robert L. Brennan,2013-03-14 Test equating methods are used with many standardized tests in education and psychology to ensure

that scores from multiple test forms can be used interchangeably In recent years researchers from the education psychology and statistics communities have contributed to the rapidly growing statistical and psychometric methodologies used in test equating This book provides an introduction to test equating which both discusses the most frequently used equating methodologies and covers many of the practical issues involved This second edition expands upon the coverage of the first edition by providing a new chapter on test scaling and a second on test linking Test scaling is the process of developing score scales that are used when scores on standardized tests are reported In test linking scores from two or more tests are related to one another Linking has received much recent attention due largely to investigations of linking similarly named tests from different test publishers or tests constructed for different purposes The expanded coverage in the second edition also includes methodology for using polytomous item response theory in equating The themes of the second edition include the purposes of equating scaling and linking and their practical context data collection designs statistical methodology designing reasonable and useful equating scaling and linking studies importance of test development and quality control processes to equating equating error and the underlying statistical assumptions for equating Given the perennial debates about academic standards and grade inflation it is my view that tools such as those described in this book should be adopted much more widely by the academic community than they are at present This book provides an excellent overview and I strongly recommend it Short Book Reviews of the ISI April 2005 I highly recommend this book to everybody who has any interest in equating and linking be they a student practitioner or researcher Psychometrika 2006
