Candidate Name: _____

Examiner Name: _____

This examination is one of two examinations chosen to satisfy graduation requirements. This examination is given only once, whereas the other, administered later in the year, is given twice. Both examinations will be marked and an answer will be submitted by mail.

Please print your name and the name of your school on the lines above.

A separate answer sheet has been provided for you. Follow the instructions from the person administering the writing examinations (your answer sheet).

This examination has four parts: written work of all questions; two short-answer questions on this examination; an additional answer sheet for Part I questions; and Part II questions on this examination. Write your answers to the questions in Parts II, III, and IV directly on this booklet; all work should be written in pen, except for graphs and drawings, which should be done in pencil. Clearly indicate necessary steps, including appropriate formulas, substitutions, and/or graphs, tables, etc.

Be mindful that a penalty will be assessed when questions on this examination are checked on the end of the examination. This does not, particularly, in any way detract from the booklet.

Handwritten work pertaining to any part of this examination that you wish use this booklet appears on this booklet, as a separate sheet of average graph paper, or on the end of this booklet, as a separate sheet of average graph paper. It is required that you use all the material on this separate sheet of average graph paper, as well as the end of this booklet, to show your work. This does not mean that the work you do on this sheet of average graph paper will not be marked.

When you have completed the examination, present your completed answer sheet to the end of the answer sheet, indicating that you have no additional work on the questions or answers given to the examination and that you have written your answers on the separate sheet of average graph paper. The examination, showing the examination, your answer sheet, and the separate sheet of average graph paper, will be marked.

Notes:

A separate answer sheet will be provided for you. This sheet will be marked and an answer will be submitted by mail.

Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally
