Therapeutic Progress in Oncology Jacques Barbet, Adrien Fouquier, Yves Thomas, 2020-04-28 The combined effects of population growth and aging have led to an increase in the number of cancers. Preventing, diagnosing, treating and curing cancer are therefore more than ever imperatives facing medicine, especially to continue the decrease in cancers' mortality rates and to improve the quality of survival. Over time, the classic modes of treatment: surgery, external beam radiotherapy, chemotherapy, have become more refined and efficient. From the beginning of this century, new therapeutic options have been developed: targeted cancer therapy, targeted radionuclide therapy and immunologic therapies based on monoclonal antibodies, cellular therapy and vaccinations. Artificial intelligence and machine learning are also being introduced to the field of oncology. Starting with the basic scientific principles relevant to oncology, this book explains and makes these concepts and innovations accessible to a wide audience, especially in the interest of patients. It also contributes to the oncological field of 4P medicine, with 4P standing for predictive, preventive, personalized and participative. Precision Medicine in Cancers and Non-Communicable Diseases Debmalya Barh, 2018-09-03 The availability of human genome, large amount of data on individual genetic variations, environmental interactions, influence of lifestyle and cutting edge tools and technologies for big data analysis have led to the era of clinical practice of Precision Medicine. This book aims to provide a readily available resource on all the important developments achieved so far in the field of oncology. All recent developments have been explained along with epidemiology, technologies and approaches to manage the included diseases. Therefore, readers will get the up to date information on the next generation approach in tackling all kinds of cancer. **Key Features:** Presents the latest trend of cancer management based on precision predictive medicine approach.
