Accessing Conceptual Representations for Speaking Peter Indefrey, Ian FitzPatrick, 2016-10-31 For speaking words in the lexicon are somehow activated from conceptual representations but we know surprisingly little about how this works precisely Which of the attributes of the concept DOG e g BARKS IS WALKED WITH A LEASH CARNIVORE ANIMATE have to be activated in a given situation to be able to select the word dog Are there things we know about dogs that are always activated for naming and others that are only activated in certain contexts or even never To date investigations on lexical access in speaking have largely focused on the effects of distractor nouns on the naming latency of a target noun We have learned that distractors from the same semantic category e g cat hinder naming but associatively related distractors leash may facilitate or hinder naming However associatively related words can have all kinds of semantic relationships to a target word and with few exceptions the effects of specific semantic relationships other than membership in the same category as the target concept have not been systematically investigated This special issue aims at moving forward towards a more detailed account of how precisely conceptual information is used to access the lexicon in speaking and what corresponding format of conceptual representations needs to be assumed

Companies, Cultures, and the Region Nick Clifton, Stefan Gartner, Dieter Rehfeld, 2016-04-08 Europe has its strength in regional cultural diversity However current debates surrounding globalisation and the integration of markets tend to focus on the homogenisation of cultures whilst the emergence of vital and innovative regional cultures has typically been neglected This edited collection addresses this gap considering relevant questions such as how strategies orientations values and symbols help a company to become aware of its location and how different regional cultures are of interest to particular types of companies The book s central focus is the interaction of regional and corporate cultures how different cultures come together shape each other and change The volume takes an interdisciplinary approach bringing together research from cultural science regional science social science and economics This book was originally published as a special issue of the journal European Planning Studies
