

Figure 1: Lawson M3 PureFlex test environment

After setting up the environment, tests were performed to validate proper functioning of the environment. On the IBM i partition, the M3 Business Engine Order Entry test was run to drive a large volume of orders through the server. With this test, the team was able to validate that the M3 application installed on the IBM i partition was behaving as expected. On the Windows partitions, the following smoke tests were performed.

#### Installation smoke tests

- LifeCycle Manager installation smoke test to verify connectivity and manageability of the LCM Service network.
- Lawson Smart Office installation smoke test, that verifies that Lawson Smart Office can be installed, started, and connected to M3 Business Engine. By this test, the team also verified that Lawson Web Services are set up correctly and functioning properly.
- M3 Enterprise Collaborator or MEC installation smoke test that verifies the connectivity for external transactions (typically similar to Electronic Data Interchange or EDI) to M3 Business Engine.
