The overall premise of the book is to help you learn Revit while developing the interior of a two story law office. At the start of the book you are provided an architectural model with established columns, beams, exterior walls, minimal interior walls and roofs in which to work. This allows more emphasis to be placed on interior design rather than primary architectural elements. The chapters chronology generally follows the typical design process. You will find this book helps you more accurately and efficiently develop your design ideas and skills. The first chapter introduces you to Revit Building Information Modeling (BIM) and the basics of opening, saving and creating a new project. The remainder of the book is spent developing the interior space of the law office with an established space program. You will learn how to view and navigate within the provided 3D architectural model, manage and create materials and develop spaces with walls, doors and windows. Once all the spaces are added to the model, several areas are explored and used as the basis to cover Revit commands and workflows. At the end of this tutorial you will be able to model floor finishes, ceilings with soffits, casework, custom reception desk, restrooms, furniture and light fixtures. Additional features such as tags, schedules and photorealistic rendering will be covered.
