Groucutt, 2020-07-23 This volume brings together diverse contributions from leading archaeologists and paleoanthropologists covering various spatial and temporal periods to distinguish convergent evolution from cultural transmission in order to see if we can discover ancient human populations With a focus on lithic technology the book analyzes ancient materials and cultures to systematically explore the theoretical and physical aspects of culture convergence and populations in human evolution and prehistory The book will be of interest to academics students and researchers in archaeology paleoanthropology genetics and paleontology The book begins by addressing early prehistory discussing the convergent evolution of behaviors and the diverse ecological conditions driving the success of different evolutionary paths Chapters discuss these topics and technology in the context of the Lower Paleolithic Earlier Stone age and Middle Paleolithic Middle Stone Age The book then moves towards a focus on the prehistory of our species over the last 40 000 years Topics covered include the human evolutionary and dispersal consequences of the Middle Upper Paleolithic Transition in Western Eurasia Readers will also learn about the

cultural convergences and divergences that occurred during the Terminal Pleistocene and Holocene such as the budding of human societies in the Americas The book concludes by integrating these various perspectives and theories and explores different methods of analysis to link technological developments and cultural convergence *The Urban Ecologies of Divided Cities* Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers

**Dynamics of Plate Tectonics and Mantle Convection** Joao C. Duarte, 2023-02-10 Dynamics of Plate Tectonics and Mantle Convection written by specialists in the field gathers state of the art perspectives on the dynamics of plate tectonics and mantle convection Plate tectonics is a unifying theory of solid Earth sciences In its initial form it was a kinematic theory that described how the planet's surface is fragmented into several rigid lithospheric plates that move in relation to each other over the less viscous asthenosphere Plate tectonics soon evolved to describe the forces that drive and resist plate movements The Earth sciences community is now developing a new perspective that looks at plate tectonics and mantle convection as part of a single system Why does our planet have plate tectonics and how does it work How does mantle convection drive the supercontinent cycle How have tectono convective modes evolved over the Earth's history How did they shape the planet and impact life Do other planets have mantle convection and tectonics These are some of the fascinating questions explored in this book This book started with a challenge from the editor to the authors to provide perspectives from their vantage point and open the curtain to the endeavors and stories behind the science Provides diverse perspectives from different experts around the world in plate tectonics and geodynamics Includes the most up to date knowledge on plate

tectonics and mantle convection Sets the scene for the developments and challenges likely to be faced by researchers in the future of geodynamics

**Pathways to Development** Samuel Hickey, Kunal Sen, 2024 This is an open access title available under the terms of a CC BY BC ND 4.0 International License It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations The puzzle of why some countries are wealthier and more developed than others continues to confound students and practitioners of development alike Whereas earlier grand explanations focused on issues of geography or institutions the second decade of the 21st century finally saw politics arrive centre stage within international development This catalyzed a search to answer the key question under what conditions do governments become committed to and capable of delivering development How can these processes be conceptualized and researched And what if anything can be done to get the politics right for development Pathways to Development draws on a major comparative research effort to present new answers to the question of how politics shapes development It develops and applies a power domains framework across

multiple countries in the global South to uncover the political drivers of development across a wide range of policy areas including economic growth gender equity health and education Hickey and Sen find that a country s pathway to development is shaped less by institutional type than by the nature of the politics and power relations that underpinned these institutions and which shape how they actually function in practice within different policy domains Comparative analysis reveals two alternative pathways to developmental outcomes each of which is specific to particular configurations of power The first involves a dominant ruling coalition with a strong developmental vision that faces an existential threat from social forces the second involves competitive settlements within which the short term vision of ruling elites and the politicization of the public bureaucracy are offset by the presence of strong and coherent coalitions within particular policy domains Hickey and Sen use these insights to generate innovative practical suggestions for policy actors seeking to promote inclusive development that are aligned to critical differences in political context
