 Keeley,2011 Author Page Keeley continues to provide K 12 teachers with her highly usable and popular formula for  
 uncovering and addressing the preconceptions that students bring to the classroom the formative assessment probe in this  
 first book devoted exclusively to life science in her Uncovering Student Ideas in Science series In this volume Keeley  
 addresses the topics of life and its diversity structure and function life processes and needs of living things ecosystems and  
 change reproduction life cycles and heredity and human biology Using the probes as diagnostic tools that identify and  
 analyze students preconceptions teachers can easily move students from where they are in their current thinking to where  
 they need to be to achieve scientific understanding At the same time use of the probes deepens the teacher s understanding  
 of the subject matter suggests instructional implications and expands assessment literacy Using the student learning data  
 gained through the probes to inform teaching and learning is what makes the probes formative Each probe is supported by  
 extensive Teacher Notes which provide background information on the purpose of the probes related concepts explanations  
 of the life science ideas being taught related ideas in the national science standards research on typical student
