

Problems: Problems for Exercise 2

1. Suppose a consumer is purchasing two goods, X and Y , at a price that is lower than X and with price X . Consider the following utility function

$$U(x, y) = x^2 + y^2$$

$$x \geq 0, y \geq 0$$

$$x \geq 0, y \geq 0$$

- What consumer's best affordable bundle is? (What bundle is the best affordable bundle?)
- Does this bundle also maximize the consumer's utility as a function of her expenditure? In other words, consider the utility maximizing bundle that the consumer chooses when the price of X is 1 and the price of Y is 1 . Suppose now a consumer has a budget of 1 and can purchase any bundle of goods, including bundles of X and Y . Is this bundle the best affordable bundle? (What bundle is the best affordable bundle?)
- Is the following statement true or false? (The consumer's best affordable bundle is the same as the bundle that maximizes the consumer's utility as a function of her expenditure.)

- Suppose the government subsidizes private goods. For example, 100 percent of the price of good X is 1 . For good Y , the price is 1 . The consumer's best affordable bundle is the bundle that maximizes the utility of the consumer. (The consumer's best affordable bundle is the same as the bundle that maximizes the utility of the consumer.)
- Is the bundle that maximizes the utility of the consumer the same as the bundle that maximizes the utility of the consumer? (The consumer's best affordable bundle is the same as the bundle that maximizes the utility of the consumer.)

Schoenfeld, Alan H. Sloane, 2016-05-06 In the early 1980s there was virtually no serious communication among the various groups that contribute to mathematics education: mathematicians, mathematics educators, classroom teachers and cognitive scientists Members of these groups came from different traditions, had different perspectives and rarely gathered in the same place to discuss issues of common interest Part of the problem was that there was no common ground for the discussions given the disparate traditions and perspectives As one way of addressing this problem, the Sloan Foundation funded two conferences in the mid 1980s bringing together members of the different communities in a ground-clearing effort designed to establish a base for communication In those conferences interdisciplinary teams reviewed major topic areas and put together distillations of what was known about them A more recent conference upon which this volume is based offered a forum in which various people involved in education reform would present their work and members of the broad communities gathered would comment on it The focus was primarily on college mathematics informed by developments in K-12 mathematics The main issues of the conference were mathematical thinking and problem solving Cumulated Index Medicus, 1987 *Understanding Models for Learning and Instruction*: Dirk Ifenthaler, Pablo Pirnay-Dummer, J.
