productivity narrow specialisation in low value added activities and poor local linkages hence limited local value creation and value capture There is still dependence on foreign controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development
