MOLTEN METAL QUICK IMMERSION TRANSFER PUMP FROM MMEI

The Raptor transfer pump from MMEI is an ideal solution for pumping out furnaces and filling containers like crucibles, molds, ladles, and ingots. Driven by a highly efficient electric motor, it has controls and a built-in cooling blower to keep the motor cool. Electric motor transfer pumps are more reliable and consistent than air-powered ones, reducing the risk of failure during transfer and ensuring consistent metal delivery.

Designed for use with aluminum, the Raptor is lightweight, portable, and can be easily moved to different power sources. Its graphite body enables fast immersion for high flow rates of up to 800 lbs. (360 Kg) per minute. The pump is durable, built to last in harsh molten metal environments, and features a heavy-duty shaft for longer service life and easy installation. The unique rotor design minimizes turbulence and avoids creating a vortex, making the Raptor stand out from other pumps on the market.

With a compact base of only 10" x 10" (254 x 254mm), the Raptor can fit through small openings, and its wide pump outlet reduces dross formation and provides quiescent metal flow. With variable speed control for adjusting metal flow, the Raptor transfer pump can save you money by eliminating the need for riser tubes and transfer piping while delivering higher performance and efficiency than standard pumps. Available in four lengths, the Raptor is the transfer pump you need.
