

Chemistry – Unit 4 Worksheet 1

Two techniques pictured below. Which technique would be useful to separate a mixture of sand and salt? Of salt and water?

Dissolved in water and filtered (insoluble component).

2. Explain why the technique at left would not be effective in separating a mixture of salt and sugar.

Both sugar and salt are soluble in water. Both would be in the solution that passes through the filter paper.

3. Draw particle representations for the following:

A mixture of iron and sulfur

Any colors, particles not bonded

A compound of iron and sulfur

Fixed ratio (not necessarily 1:1), particles bonded

Haghi, Sabu Thomas, Praveen K.M., Avinash R. Pai, 2018-10-01 This new volume presents an up to date review of modern materials and physical chemistry concepts issues and recent advances in the field It presents a modern theoretical and experimental approach in applied physical chemistry The volume discusses the developments of advanced chemical products and respective tools to characterize and predict the chemical material properties and behavior With chapters from distinguished scientists and engineers from key institutions worldwide the volume provides understanding through numerous examples and practical applications drawn from research and development chemistry It emphasizes the intersection of chemistry math physics and the resulting applications across many disciplines of science and explores applied physical chemistry principles in specific areas At the same time each topic is framed within the context of a broader more interdisciplinary approach demonstrating its relationship and interconnectedness to other areas This new book fills a gap within modeling texts focusing on applications across a broad range of disciplines and presents information on many important problems in physical chemistry These investigations are accompanied by real life applications in practice *Chemistry in the Community*. American Chemical Society, 2002 This volume has relevance to a wide number of courses giving a hands on introduction to chemistry in relation to community issues rather than around specific chemical concepts **Chemistry in the Community (ChemCom)** American Chemical Society, 2011-06-17 Touted as the most successful NSF funded project published Chemistry in the Community ChemCom by the American Chemical Society ACS offers a meaningful and memorable chemistry program for all levels of high school students ChemCom covers traditional chemistry topics within the context of societal issues and real world scenarios Centered on decision making activities where students are responsible for generating data in an investigating analyzing that data and then applying their chemistry knowledge to solve the presented problem The text is intensively laboratory based with all 39 of the investigations integrated within the text not separate from the reading With the ChemCom program students learn more organic and biochemistry more environmental and industrial chemistry and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life Meticulously updated to meet the needs of today s teachers and students the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next generation of science standards Incorporating advances in learning and cognitive sciences ChemCom s wide ranging coverage builds upon the concepts and principles found in the National Science Education Standards Correlations are available showing how closely aligned ChemCom is to these and other state standards
