J. Crow, 2004-01-08 This is the first volume to address directly the question of the speciation of modern Homo sapiens The subject raises profound questions about the nature of the species our defining characteristic it is suggested it is language and the brain changes and their genetic basis that make us distinct The British Academy and the Academy of Medical Sciences have brought together experts from palaeontology archaeology linguistics psychology genetics and evolutionary theory to present evidence and theories at the cutting edge of our understanding of these issues Palaeontological and genetic work suggests that the transition from a precursor hominid species to modern man took place between 100 000 and 150 000 years ago Some

contributors discuss what is most characteristic of the species focussing on language and its possible basis in brain lateralization This work is placed in the context of speciation theory which has remained a subject of considerable debate since the evolutionary synthesis of Mendelian genetics and Darwinian theory The timing of specific transitions in hominid evolution is discussed as also is the question of the neural basis of language Other contributors address the possible genetic nature of the transition with reference to changes on the X and Y chromosomes that may account for sex differences in lateralization and verbal ability These differences are discussed in terms of the theory of sexual selection and with reference to the mechanisms of speciation These essays will be vital reading for anyone interested in the nature and origins of the species and specifically human abilities Catalog of Copyright Entries. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
