Advances in Probabilistic and Other Parsing Technologies H. Bunt,Anton Nijholt,2013-03-09 Parsing technology is concerned with finding syntactic structure in language In parsing we have to deal with incomplete and not necessarily accurate formal descriptions of natural languages Robustness and efficiency are among the main issuesin parsing Corpora can be used to obtain frequency information about language use This allows probabilistic parsing an approach that aims at both robustness and efficiency increase Approximation techniques to be applied at the level of language description parsing strategy and syntactic representation have the same objective Approximation at the level of syntactic representation is also known as underspecification a traditional technique to deal with syntactic ambiguity In this book new parsing technologies are collected that aim at attacking the problems of robustness and efficiency by exactly these techniques the design of probabilistic grammars and efficient probabilistic parsing algorithms approximation techniques applied to grammars and parsers to increase parsing efficiency and techniques for underspecification and the integration of semantic information in the syntactic analysis to deal with massive ambiguity The book gives a state of the art overview of current research and development in parsing technologies In its chapters we see how probabilistic methods have entered the toolbox of computational linguistics in order to be applied in both parsing theory and parsing practice The book is both a unique reference for researchers and an introduction to the field for interested graduate students

Feminist Utopian Novels of the 1970s Tatiana Teslenko,2003-08-19 This book presents an exploration of the reinvented utopia that provided second wave feminists of the 1970s with a conceptual space to articulate the politics of change Tatiana Teslenko argues that utopian fiction of this decade offered a means of validating the personal as well as the political and of criticizing a patriarchal social

Adams,2020-07-23 This book sets out to describe the multi dimensional nature and function of rhetorical questions in the Old Testament Biblical scholars have previously analyzed the use of rhetorical questions in both Testaments but consistently describe their function in persuasive terms While this understanding is appropriate in a number of instances many rhetorical questions do not operate this way and Jim W Adams focuses in particular on rhetoric expressing the self involvement of both the speaker and hearer Among linguistic philosophers speech act theory has illuminated the fact that uttering a sentence does not merely convey information it may also involve the performing of an action The concept of communicative action provides additional tools to the exegetical process as it points the interpreter beyond the assumption that the use of language is merely for descriptive purposes Language can also have performative and self involving dimensions In relation to speech act theory linguistic specialists continue to research the nature of rhetorical questions

Computational Intelligence: Theory and Applications Bernd Reusch,2007-07-16 Fuzzy Days in Dortmund were held for the first time in 1991 Initially the conference was intended for scientists and practitioners as a platform for discussions on theory and application of fuzzy logic Early on synergetic links with neural networks were included and the conference evolved gradually to embrace the full spectrum of what is now called Computational Intelligence CI Therefore it seemed logical to launch the 4th Fuzzy Days in 1994 as a conference for CI one of the world s first conferences featuring fuzzy logic neural networks and evolutionary algorithms together in one event Following this successful tradition the 6th Fuzzy Days aim is to provide an international forum for reporting significant results on the theory and application of CI methods Once again we have received a remarkable number of papers I would like to express my gratitude to all who have been interested in presenting their work within the framework of this conference and to the members of the programme committee for their valuable work in this edition each paper was reviewed by five referees In particular I wish to thank all keynote and tutorial speakers for their commitment Last but not least I am obliged to the Deutsche Forschungsgemeinschaft and Kommunalverband Ruhrgebiet for their financial support
