Treaties and Other International Acts Series , 1946 **Partners in Science** Robert E. Kohler, 1991 Robert Kohler shows exactly how entrepreneurial academic scientists became intimate partners in science with the officers of the large foundations created by John D Rockefeller and Andrew Carnegie and in so doing tells a fascinating story of how the modern system of grant getting and grant giving evolved and how this funding process has changed the way laboratory scientists make their careers and do their work This book is a rich historical tapestry of people institutions and scientific ideas It will stand for a long time as a source of precise and detailed information about an important aspect of the scientific enterprise It also contains many valuable lessons for the coming years John Ziman Times Higher Education Supplement

Toxic War Peter Sills, 2014-02-15 The war in Vietnam spanning more than twenty years was one of the most divisive conflicts ever to envelop the United States and its complexity and consequences did not end with the fall of Saigon in 1975 As Peter Sills demonstrates in Toxic War veterans faced a new enemy beyond post traumatic stress disorder or debilitating battle injuries Many of them faced a new more pernicious slow killing enemy the cancerous effects of Agent Orange Originally introduced by Dow and other chemical companies as a herbicide in the United States and adopted by the military as a method of deforesting the war zone of Vietnam in order to deny the enemy cover Agent Orange also found its way into the systems of numerous active duty soldiers Sills argues that manufacturers understood the dangers of this compound and did nothing to protect American soldiers Toxic War takes the reader behind the scenes into the halls of political power and industry where the debates about the use of Agent Orange and its potential side effects raged In the end the only way these veterans could

seek justice was in the court of law and public opinion Unprecedented in its access to legal medical and government documentation as well as to the personal testimonies of veterans Toxic War endeavors to explore all sides of this epic battle

Power and US Foreign Policy Inderjeet Parmar,Michael Cox,2010-03-12 The rise of widespread negative attitudes towards US foreign policy especially due to the war of aggression against Iraq and the subsequent military occupation of the country has brought new attention to the meaning and instruments of soft power In this edited collection an outstanding line up of contributors provides the most extensive discussion of soft power to date Soft power is the use of attraction and persuasion rather than the use of coercion or force in foreign policy It arises from the attractiveness of a country s culture political ideals and policies whereas hard power develops out of a country s military or economic might Soft Power has become part of popular political discourse since it was coined by Harvard s Joseph Nye and this volume features a brand new chapter by Nye outlining his views on soft hard and smart power and offers a critique of the Bush administration s inadequacies He then goes on to examine the challenges for the incoming US president The other contributions to the volume respond to Nye s views from a range of theoretical historical and policy perspectives giving new insights in to both soft power and the concept of power itself This is the most comprehensive and up to date analysis of this key concept in foreign affairs and is essential reading for scholars of US foreign policy public diplomacy international relations and foreign policy analysis *The Green*

and the Brown Frank Uekötter,2006-08-14 This study provides the first comprehensive discussion of conservation in Nazi Germany Looking at Germany in an international context it analyses the roots of conservation in the late 19th century the gradual adaptation of racist and nationalist thinking among conservationists in the 1920s and their indifference to the Weimar Republic It describes how the German conservation movement came to cooperate with the Nazi regime and discusses the ideological and institutional lines between the conservation movement and the Nazis Uekoetter further examines how the conservation movement struggled to do away with a troublesome past after World War II making the environmentalists one of the last groups in German society to face up to its Nazi burden It is a story of ideological convergence of tactical alliances of careerism of implication in crimes against humanity and of deceit and denial after 1945 It is also a story that offers valuable lessons for today s environmental movement **Doing Good Great** Willie Cheng,Sharifah

Mohamed,Cheryl Tang,2015 From migrant workers and media freedom to housing slums this book captures the gamut of social issues that plague Asia telling the stories behind thirteen committed individuals who have effected great change in their respective causes These stories are about the behemoths such as Dharma Master Cheng Yen from Taiwan and Sir Fazle Hasan Abed from Bangladesh who lead some of the world s largest nongovernmental organisations to Aki Ra from Cambodia

and Sompop Jakantra from Thailand whose smaller teams have saved hundreds of lives from landmines and prostitution respectively The social heroes portrayed have pursued seemingly quotidian causes that citizens of developed countries may take for granted such as toilets in India decent housing for the poor in Hong Kong and mainly making life better for those whom society appears to have forgotten Reader Reviews The people working to address social issues are not always as well documented as the issues themselves it is important to bring an awareness of them into the mainstream media It s easy to become overwhelmed by societal injustice but these stories show that even when you can t count on your government to protect your rights individuals working in social justice can make positive change Camille Neale **AWARE** This book is an excellent snapshot of 12 Asian countries and their circumstances and challenges Cheong Suk Wai *The Straits Times* [Big Science](#) Michael Hiltzik,2015 A heroic time South Dakota boy I m going to be famous Shims and sealing wax Oppie The deuton affair The cyclotron republic John Lawrence s mice Laureate Mr Loomis Ernest are you ready The racetrack Oak Ridge The road to Trinity The postwar bonanza Oaths and loyalties The shadow of the Super Livermore The Oppenheimer affair The return of small science The clean bomb Element 103 **Nature** Sir Norman Lockyer,1881 [A Transatlantic History of the Social Sciences](#) Christian Fleck,2011-02-25 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com From the beginning of the twentieth century scientific and social scientific research has been characterised by intellectual exchange between Europe and the US The establishment of the Third Reich ensured that from the German speaking world at least this became a one way traffic In this book Christian Fleck explores the invention of empirical social research which by 1950 had become the binding norm of international scholarship and he analyses the contribution of German refugee social scientists to its establishment The major names are here from Adorno and Horkheimer to Hirshman and Lazarsfeld but at the heart of the book is a unique collective biography based on original data from more than 800 German speaking social scientists Published in German in 2008 to great acclaim Fleck s important study of the transatlantic enrichment of the social sciences is now available in a revised English language edition [Museum Studies](#) Bettina Messias Carbonell,2012-04-23 Updated to reflect the latest developments in twenty first century museum scholarship the new Second Edition of *Museum Studies An Anthology of Contexts* presents a comprehensive collection of approaches to museums and their relation to history culture and philosophy Unique in its deep range of historical sources and by its inclusion of primary texts by museum makers Places current praxis and theory in its broader and deeper historical context with the collection of primary and secondary sources spanning more than 200 years Features the latest developments in museum scholarship concerning issues of inclusion and exclusion repatriation indigenous models of collection and display museums in an age of globalization visitor studies and interactive technologies Includes a new section on relationships interactions and responsibilities Offers an updated bibliography and list of resources devoted to museum studies that makes the volume an authoritative guide on the subject New entries by Victoria

proponents endorsing climate action are well known many of the major players have gone largely unrecognized The oceanographer Roger Revelle exerted influence on eight White Houses during his life and even one after his death when his former student Al Gore assumed the office of vice president William Nordhaus had already written seminal studies on climate change when President Jimmy Carter appointed him to the Council of Economic Advisors Four decades later the Yale professor won the Nobel Prize in economics for his work on the subject John Chafee a Republican from Rhode Island chaired the Senate s first committee on the problem and provided concrete solutions to face the dangers of a warming planet during the Reagan administration The drama reached a full pitch during the George H W Bush years as vocal advocates for climate action and staunch foes of government regulation wrestled over the direction of U S energy and environmental policy To better trace the evolving climate debate in America author Jay Hakes inspected the archives and writings of prominent scientists and the pivotal reports of the National Academy of Sciences and traveled to presidential libraries to discover how commanders in chief and their science economic and political advisors addressed the issue The Presidents and the Planet affords fresh perspectives that will alter the public s understanding of when officials first grasped the dire consequences of climate change
