DESCRIPTION AND APPLICATIONS

The Electro-Voice Model RE85 miniature lavalier microphone provides the ultimate in quality and versatility for the professional user. By means of a new internally shock-mounted microphone capsule, the RE85 can offer protection from mechanical abuse due to contact with clothes and cord conduction to a degree never before possible. This miniature microphone can be used: held in the hand, hung on a neck cord, or suspended on a te. clip assembly, leaving the hands of an announcer or performer free. It is excellent for audience participation, on-the-street interviews, panel shows — wherever microphone concealment, individual mobility, or free movement of the hands is desired. No closely associated auxiliary equipment is required.

The RE85 employs a unique new floating shock-mount capsule, similar to that employed in the Electro-Voice Model RE50. The complete generating element and necessary auxiliary parts are contained in an internal capsule which is precision shock-mounted in highly compliant rubber inside an extremely rugged and durable turned-steel case. The normal problems of mechanical noise conduction associated with lavalier microphones (noise from contact with clothing, from cord contact with clothing and hand contact) are virtually eliminated.

The RE85 features the exclusive Electro-Voice Accoustally® diaphragm. This non-metallic diaphragm withstands high humidity, temperature extremes, corrosive effects of salt air and severe mechanical abuse. It is practically indestructible with normal use.

The RE85 is supplied with three specially designed accessories intended to increase the usefulness and mounting convenience of the microphone — a lavalier neck cord assembly from which the microphone can hang, suspended in a normal lavalier fashion on the chest of the user; a flexible te. clip assembly, which allows clamping the microphone in a position similar to that of a tie clip and a belt clip which can be used to keep the cord in constant position with uniform tension on the microphone. The cord assembly is supplied attached to the microphone. Used in conjunction with the neck cord assembly or tie clip assembly, the belt clip also helps to prevent unwanted mechanical abuse. After inserting the cable in the clip shown in Figure 1, simply attach it to the belt or one side. It may also be slipped over the edge of a pocket or lapel.

A protective vinyl carrying pouch is also provided to house the microphone and its accessories, shielding the microphone from moisture, airborne magnetic particles and dust when not in use.

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The microphone shall be an omnidirectional dynamic type with non-metallic Accoustally® diaphragm. The microphone shall have a magnetic shield to prevent dust and magnetic particles from reaching the diaphragm. It shall have a floating head capsule, internally shock-mounted to a high degree. A response of 50-10,000 Hz shall be obtained. Care shall be taken to ground and shield.
