**The Gesamtkunstwerk in Design and Architecture** Anders V. Munch, 2021-04-16 The history of modern design and

architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture. These attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art, mostly associated with but certainly not limited to Richard Wagner's theoretical writings and musical dramas. This utopian dream of the Gesamtkunstwerk or Total Work of Art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories, cities, and even modern media. As a result, the experiments ranged from music, poetry, and drama to architecture, design, visual communication, and city planning. These ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today, but their complex and often problematic roots are mostly ignored. Design and architecture have delivered some of the broadest and most influential experiments with the Gesamtkunstwerk, from garden cities for workers and corporate identity design to the German AEG corporation.

Personal and Practical Decorating Guide Gary McCallum, 2020-10-06

Personal and Practical Decorating Guide shows how designing a home can be an outlet of personal expression and an exercise in self-discovery. Drawing on her ten years of experience in the interior design industry, author combines honest design advice and gorgeous professional photographs and illustrations with personal essays about the lessons she has learned while designing her own home and her own life. The first being none of our homes or lives is perfect. Like a funny best friend, she reveals the disasters she confronted in her own kitchen renovation, her struggles with anorexia, her epic fight with her husband, and her secrets for starting a successful blog. Organized by rooms in the house, Personal and Practical Decorating Guide invites readers into author's own home as well as homes she has designed for clients. Fresh, modern, and colorful, it is brimming with glamour and style as well as advice on practical matters, from choosing kitchen counter materials to dressing a bed with pillows, picking a sofa, and decorating a nursery without cartoon characters. You'll also find a charming foreword by her husband and an extensive resource and shopping guide that provides an indispensable roadmap for anyone embarking on their first serious home decorating adventure. With author's help, you can finally make your house your home.

Shaping the World as a Home Erik Evens, 2024-09-03

The first book on the precisely detailed, sumptuous architecture of one of the finest firms working in traditional styles in California. Evens has long been considered one of the country's leading contemporary architects who aspires to create the complete living environment in the same vein as Gil Schafer, Bobby McAlpine, Ray Booth, and Stanley Dixon. His inspiration is drawn from classical traditions and informed by contemporary indoor-outdoor life. In this case, the indoor-outdoor life of California. Evens explains the core design values that bring unique and compelling force to his work: crafting architecture that speaks to people. Evens's projects are stylistically diverse, from a Spanish Colonial Revival estate in Malibu overlooking the Pacific to an American farmhouse-inspired residence in the golden hills of Southern California to a gracious ranch house embedded within the old oak trees studding the coastal landscape of Montecito. Natural materials such

as wood stone and brick form the foundations walls and ceilings of these subtly luxurious spaces while nature itself plays a considered role that is at once complementary and intricately conjoined with the work

**Nostalgic Design** William C. Kurlinkus, 2019-01-09 Nostalgic Design presents a rhetorical analysis of twenty first century nostalgia and a method for designers to create more inclusive technologies Nostalgia is a form of resistant commemoration that can tell designers what users value about past designs why they might feel excluded from the present and what they wish to recover in the future By examining the nostalgic hacks of several contemporary technical cultures from female software programmers who knit on the job to anti vaccination parents Kurlinkus argues that innovation without tradition will always lead to technical alienation whereas carefully examining and layering conflicting nostalgic traditions can lead to technological revolution
