Righting Health Policy D. Robert MacDougall, 2022-02-23 In *Righting Health Policy* D Robert MacDougall argues that bioethics needs but does not have adequate tools for justifying law and policy Bioethics tools are mostly theories about what we owe each other But justifying laws and policies requires more at a minimum it requires tools for explaining the legitimacy of actions intended to control or influence others It consequently requires political rather than moral philosophy After showing how bioethicists have consistently failed to use tools suitable for achieving their political aims MacDougall develops an interpretation of Kant's political philosophy On this account the legitimacy of health laws does not derive from the morality of the behaviors they require but derives instead from their role in securing our equal freedom from each other MacDougall uses this Kantian account to show the importance of political philosophy for bioethics First he shows how evaluating kidney markets in terms of the legitimacy of prohibiting sales rather than the morality of selling kidneys reverses the widely accepted view that Kantian philosophy supports legally prohibiting markets Second MacDougall argues that an account of political authority is necessary for settling longstanding bioethics debates about the legal and even moral standards that should govern informed consent
