

Model 2 – The Link Reaction

9. According to Model 2, where in a cell does the link reaction take place?

The link reaction takes place in the inner matrix.

10. Consider the pyruvate molecule.

- a. Is the pyruvate molecule likely to move across the mitochondrial membrane by diffusion? (Your answer should include a comment about polarity.)

The pyruvate molecule is unlikely to move across the mitochondrial membrane by diffusion. The pyruvate molecule is polar, so it won't be able to pass through the nonpolar lipid bilayer.

- b. Propose a method by which the pyruvate molecule moves across the mitochondrial membrane.

The pyruvate molecule might move across the mitochondrial membrane using a protein carrier.

11. During the link reaction, the pyruvate acid molecule is decarboxylated. What molecule is removed during this process?

Carbon dioxide is removed during the decarboxylation process.
