Criteria for Science Teaching Yvonne Anders, Ilonca Hardy, Sabina Pauen, Jörg Ramseger, Beate Sodian, Mirjam Steffensky, 2017-11-13 Scientific contributions authored by distinguished experts from the field of early education are published periodically within the framework of the series Scientific Studies on the Work of the Haus der kleinen Forscher Foundation. This publication series serves to foster informed dialogue between the Foundation scientists and practitioners with the aim of giving all early childhood education and care centres, after school centres and primary schools in Germany scientifically sound support in fulfilling their early education mandate. This fifth volume in the series focuses on goals of science education at the level of the children, the early childhood professionals and the pedagogical staff at after school centres and primary schools and on process related quality criteria for science teaching at pre primary and primary level. In their expert reports Yvonne Anders, Ilonca Hardy, Sabina Pauen, Beate Sodian and Mirjam Steffensky specify pedagogical content dimensions of the goals of early science education at pre primary and primary school age. In addition to theoretically underpinning these goals, the authors present instruments for their assessment. In his expert report Jörg Ramseger formulates ten quality criteria for science teaching. Early childhood professionals and pedagogical staff at after school centres and primary schools can draw on these process related criteria when planning lessons and conducting self evaluations of science learning opportunities at pre primary and primary level. The concluding chapter of the volume describes the implementation of these expert recommendations in the substantive offerings of and the accompanying research on the Haus der kleinen Forscher Foundation.

Fundamentals of Nursing' 2004 Ed. 2004 Edition, *The Origin and Goal of History* Karl Jaspers, 2021-03-28 Karl Jaspers 1883-1969 was a German psychiatrist and philosopher and one of the most original European thinkers of the twentieth century. As a major exponent of existentialism in Germany, he had a strong influence on modern theology, psychiatry and philosophy. He was Hannah Arendt's supervisor before her emigration to the United States in the 1930s and himself experienced the consequences of Nazi persecution. He was removed from his position at the University of Heidelberg in 1937 due to his wife being Jewish. Published in 1949, the year in which the Federal Republic of Germany was founded, *The Origin and Goal of History* is a vitally important book. It is renowned for Jaspers' theory of an Axial Age running from the 8th to the 3rd century BCE. Jaspers argues that this period witnessed a remarkable flowering of new ways of thinking that appeared in Persia, India, China and the Greco-Roman world in striking parallel development but without any obvious direct cultural contact between them. Jaspers identifies key thinkers from this age including Confucius, Buddha, Zarathustra, Homer and Plato, who had a profound influence on the trajectory of future philosophies and religions. For Jaspers, crucially, it is here that we see the flowering of diverse philosophical beliefs such as scepticism, materialism, sophism, nihilism and debates about good and evil, which taken together demonstrate human beings' shared ability to engage with universal humanistic questions as opposed to those mired in nationality or authoritarianism. At a deeper level, *The Origin and Goal of History* provides a crucial philosophical framework for the liberal renewal of German intellectual life after 1945 and indeed

of European intellectual life more widely as a shattered continent attempted to find answers to what had happened in the preceding years This Routledge Classics edition includes a new Foreword by Christopher Thornhill
