

100+ Good Conclusion Starters for the Last Paragraph

In conclusion

Thus

To summarize

I conclude that

In a nutshell

In closing

In brief

In short

Surely

To finish with

To sum it all up

To put it briefly

Cutting a long story short

On balance

As a final point

In the final analysis

For the most part,

All things considered

For these reasons

So, I have concluded that

In effect

In my opinion

In the end

To wrap it all up

The summative conclusion is that

The study concluded

The broad conclusion

Towards this end

Good Conclusion Starters For Research Papers:

Starter Cultures in Food Production Barbara Speranza, Antonio Bevilacqua, Maria Rosaria Corbo, Milena Sinigaglia, 2017-02-27 Starter cultures have great significance in the food industry due to their vital role in the manufacture of flavour and texture development of fermented foods. Once mainly used in the dairy industry, nowadays starter cultures are applied across a variety of food products including meat, sourdough, vegetables, wine, and fish. New data on the potential health benefits of these organisms has led to additional interest in starter bacteria. *Starter Cultures in Food Production* details the most recent insights into starter cultures. Opening with a brief description of the current selection protocols and industrial production of starter cultures, the book then focuses on the innovative research aspects of starter cultures in food production. Case studies for the selection of new starter cultures for different food products: sourdough and cereal-based foods, table olives and vegetables, dairy and meat products, fish, and wine are presented before chapters devoted to the role of lactic acid bacteria in alkaline fermentations and ethnic fermented foods. This book will provide food producers, researchers, and students with a tentative answer to the emerging issues of how to use starter cultures and how microorganisms could play a significant role in the complex process of food innovation.

New Advances in Designs, Codes and Cryptography Charles J. Colbourn, Jeffrey H. Dinitz, 2024-04-08 This volume records and disseminates selected papers from the Stinson66 conference, including surveys, prospectives, and papers presenting original and current research. It contains four accessible surveys of topics in combinatorial designs and related topics, ranging from a tutorial survey of connections to classical group theory to surveys of hot topics in current research. It also contains a prospective paper identifying topics for future research efforts, co-authored by one of the elder statesmen of the field, Alex Rosa. Finally, the research papers examine topics ranging from pure mathematics to applied work in computing, networking, communications, and cryptography. For students and newcomers to these topics, the volume provides accessible survey material that does not have onerous prerequisites. The breadth of topics reflects the vibrancy of the field in a way that can be appreciated by all researchers. The papers present important advances on theory and applications, which also benefit advanced researchers.
