Guide to Aquascaping for Beginners Vincent Bronson, 2020-11-24 Aquarium basically is a receptacle for maintaining aquatic organisms either freshwater or marine or a facility in which a collection of aquatic organisms is displayed or studied The earliest known aquarists were the Sumerians who kept fishes in artificial ponds at least 4 500 years ago records of fish keeping also date from ancient Egypt and Assyria The Chinese who raised carp for food as early as 1000 BCE were probably the first to breed fish with any degree of success Their selective breeding of ornamental goldfish was later introduced to Japan where the breeding of ornamental carp was perfected The ancient Romans who kept fish for food and entertainment were the first known marine aquarists they constructed ponds that were supplied with fresh seawater from the ocean Although goldfish were successfully kept in glass vessels in England

during the middle 1700s aquarium keeping did not become well established until the relationship between oxygen animals and plants became known a century later Prior to the middle of the 19th century the term aquarium was applied in botany to describe a container used for growing aquatic plants Although French born naturalist Jeanne Villepreux Power invented the first recognizable glass aquarium in 1832 it was in the works of British naturalist Philip Gosse however that the term first took on its modern meaning as a vessel in which aquatic animals as well as plants can be held His work aroused increased public interest in aquatic life By 1850 the keeping of fishes amphibians and reptiles had become useful in the study of nature The first display aquarium was opened to the public in 1853 at Regent s Park in London It was followed by aquariums in Berlin Naples and Paris P T Barnum the circus entrepreneur recognized the commercial possibilities of living aquatic animals and in 1856 opened the first display aquarium at the American Museum in New York City as a private enterprise By 1928 there were 45 public or commercial aquariums throughout the world but growth then slowed and few new large aquariums appeared until after World War II Many of the world s principal cities now have public aquariums as well as commercial ones Another category encompasses those aquariums that serve chiefly as research institutions Among the best known of the latter are those at Naples the Oceanographic Museum of Monaco Plymouth Marine Laboratory Eng and Scripps Institution of Oceanography La Jolla Calif Still another category includes temporary aquariums that have served as exhibits at world s fairs and expositions In 1938 the first oceanarium or large marine aquarium Marineland opened near St Augustine Fla as a private enterprise it featured a giant community fish tank and trained dolphins The Seaquarium Miami is similar The emphasis in this type of aquarium is on very large tanks up to 1 000 000 gallons each in which a great variety of fishes is placed with no attempt to separate them In the formal aquarium e g the Shedd Aquarium Chicago the kinds and types of fishes are separated in most of the exhibits

Essential Equipment for a Freshwater Aquarium Setting up a freshwater aquarium is an exciting and fulfilling experience Whether you are a parent looking to teach your children about responsibility a hobbyist wanting to create a beautiful aquatic environment or an adult seeking a calming and therapeutic activity understanding the essential equipment for a freshwater aquarium is crucial for maintaining happy and healthy fish

Aquarium Tank The first step in creating a freshwater aquarium is selecting the right tank Consider the size of your available space and the number of fish you intend to keep A larger tank provides a more stable environment and allows for a greater variety of fish

Filtration System A reliable filtration system is essential for maintaining water quality It removes harmful substances such as ammonia and nitrites keeping the water clean and safe for your fish Choose a filter that suits the size of your tank and consider options like sponge filters canister filters or power filters

Heater Most freshwater fish thrive in a specific temperature range A heater ensures the water remains within the ideal temperature range promoting the health and well being of your fish Select a heater with a built in thermostat for precise temperature control

Lighting Proper lighting is crucial for the growth of aquatic plants and the overall aesthetic appeal of your aquarium LED lights are energy efficient and provide a natural looking illumination Opt for a lighting system that mimics the day night cycle to create a natural environment for your fish
