thwarted Progressive efforts But the explanation is actually simpler John Murray contends in this book Careful analysis of the workings of industrial sickness funds suggests that workers rejected plans for compulsory state insurance because they were largely content with existing private plans Murray revises our understanding of the evolution of health care insurance in the United States and discusses the implications of that history for the ongoing debates of today *The Economics of American Agriculture* Steven C. between economics and security is contingent on how close to home threats whether actual or potential originate When terrorist events affect the residents of a country or take place within its borders economic ties matter less When terrorist violence strikes elsewhere and does not involve its citizens the unaffected state's investment in globalization carries the day Avdan examines the visa waiver programs and visa control policies of several countries in place in 2010 including Turkey's migration policies analyzes the visa issuance practices of the European Union from 2003 until 2015 and explores how terrorism and trade affected states' propensities to build border walls in the post World War II era Her findings challenge the claim that border crackdowns are a reflexive response to terrorist violence and qualify globalists' assertions that economic globalization makes for open borders *Visas and Walls* encourages policymakers and leaders to consider more broadly the effects of economic interdependence on policies governing borders and their permeability

**Why Americans Hate the Media and How It Matters** Jonathan M. Ladd, 2011-12-05 As recently as the early 1970s the news media was one of the most respected institutions in the United States Yet by the 1990s this trust had all but evaporated Why has confidence in the press declined so dramatically over the past 40 years And has this change shaped the public's political behavior This book examines waning public trust in the institutional news media within the context of the American political system and looks at how this lack of confidence has altered the ways people acquire political information and form electoral preferences Jonathan Ladd argues that in the 1950s 60s and early 70s competition in American party politics and the media industry reached historic lows When competition later intensified in both of these realms the public's distrust of the institutional media grew leading the public to resist the mainstream press's information about policy outcomes and turn toward alternative partisan media outlets As a result public beliefs and voting behavior are now increasingly shaped by partisan predispositions Ladd contends that it is not realistic or desirable to suppress party and media competition to the levels of the mid twentieth century rather in the contemporary media environment new ways to augment the public's knowledgeability and responsiveness must be explored Drawing on historical evidence experiments and public opinion surveys this book shows that in a world of endless news sources citizens' trust in institutional media is more important than ever before
