Guide To Biometrics Springer Professional Computing:

Guide to Biometrics Ruud M. Bolle, Jonathan H. Connell, Sharath Pankanti, Nalini K. Ratha, Andrew W.

Senior, 2013-06-29 Starting with fingerprints more than a hundred years ago there has been ongoing research in biometrics. Within the last forty years face and speaker recognition have emerged as research topics. However, as recently as a decade ago biometrics itself did not exist as an independent field. Each of the biometric related topics grew out of different disciplines. For example, the study of fingerprints came from forensics and pattern recognition, speaker recognition evolved from signal processing, the beginnings of face recognition were in computer vision, and privacy concerns arose from the public policy arena. One of the challenges of any new field is to state what the core ideas are that define the field in order to provide a research agenda for the field and identify key research problems. Biometrics has been grappling with this challenge since the late 1990s. With the maturation of biometrics, the separate biometrics areas are coalescing into the new discipline of biometrics. The establishment of biometrics as a recognized field of inquiry allows the research community to identify problems that are common to biometrics in general. It is this identification of common problems that will define biometrics as a field and allow for broad advancement.

Fundamentals of Verbal and Nonverbal Communication and the Biometric Issue Anna Esposito, NATO Programme for Security through Science, 2007. Advances in Biometric Person Authentication Stan Z. Li, Jianhuang Lai, Tieniu Tan, Guocan Feng, Yunhong Wang, 2004-11-29. Following the previous four annual conferences, the 5th Chinese Conference on Biometrics Recognition (Sinobiometrics 2004) was held in Guangzhou, China, in December 2004. The conference this year was aimed at promoting the international exchange of ideas and providing an opportunity for keeping abreast of the latest developments in biometric algorithms, systems, and applications. The 1st Biometrics Verification Competition (BVC) on face, iris, and fingerprint recognition was also conducted in conjunction with the conference. This book is composed of 74 papers presented at Sinobiometrics 2004, contributed by researchers and industrial practitioners from Korea, Japan, Singapore, Hong Kong, France, UK, US, as well as China. Of these 60 papers were selected from 140 submissions, and 14 were invited. The papers not only presented recent technical advances but also addressed issues in biometric system design, standardization, and applications. Included among the invited were four feature papers on the ideas and algorithms of the best performing biometric engines, which were either competition winners at the Face Authentication Test (FAT) 2004 or the

Fingerprint Verification Competition FVC 2004 or they were the best performing iris and palmprint recognition algorithms The papers were complemented by five keynote lectures on biometrics and face fingerprint and iris authentication and multimodal fusion by Arun Ross West Virginia University and Anil K Jain Michigan State University Josef Kittler University of Surrey John Daugman University of Cambridge Raffaele Cappelli University of Bologna and Stan Z Li Chinese Academy of Sciences
