Electromagnetic Radiation Scattering and Diffraction Discover a graduate level text for students specializing in electromagnetic wave radiation scattering and diffraction for engineering applications In Electromagnetic Radiation Scattering and Diffraction distinguished authors Drs Prabhakar H Pathak and Robert J Burkholder deliver a thorough exploration of the behavior of electromagnetic fields in radiation scattering and guided wave environments The book tackles its subject from first principles and includes coverage of low and high frequencies It stresses physical interpretations of the electromagnetic wave phenomena along with their underlying mathematics The authors emphasize fundamental principles and provide numerous examples to illustrate the concepts contained within Students with a limited undergraduate electromagnetic background will rapidly and systematically advance their understanding of electromagnetic wave theory until they can complete useful and important graduate level work on electromagnetic wave problems Electromagnetic Radiation Scattering and Diffraction also serves as a practical companion for students trying to simulate problems with commercial EM software and trying to better interpret their results Readers will also benefit from the breadth and depth of topics such as Basic equations governing all electromagnetic EM phenomena at macroscopic scales are presented

systematically Stationary and relativistic moving boundary conditions are developed Waves in planar multilayered isotropic and anisotropic media are analyzed EM theorems are introduced and applied to a variety of useful antenna problems Modal techniques are presented for analyzing guided wave and periodic structures Potential theory and Green's function methods are developed to treat interior and exterior EM problems Asymptotic High Frequency methods are developed for evaluating radiation Integrals to extract ray fields Edge and surface diffracted ray fields as well as surface leaky and lateral wave fields are obtained A collective ray analysis for finite conformal antenna phased arrays is developed EM beams are introduced and provide useful basis functions Integral equations and their numerical solutions via the method of moments are developed The fast multipole method is presented Low frequency breakdown is studied Characteristic modes are discussed Perfect for graduate students studying electromagnetic theory Electromagnetic Radiation Scattering and Diffraction is an invaluable resource for professional electromagnetic engineers and researchers working in this area

**Marine Pilotage** Great Britain: Parliament: House of Commons: Transport Committee, 2013-03-07 This report questions whether the Department for Transport is striking the appropriate balance between its role as a regulator of port safety and its aim to promote the commercial attractiveness of UK ports This follows evidence that most ports fail to confirm to Government that they comply with best practice guidance on port safety and the Maritime and Coastguard Agency has the resources to conduct just four port health checks each year Representatives of marine pilots who guide ships in and out of ports lack confidence that the Department for Transport understands their concerns and the requirements of their work and shares their aim of enhancing maritime safety The Committee is opposed to a proposal supported by Government to relax the rules on the granting of pilotage exemption certificates to more junior navigating officers which could jeopardise safety If the Government insists on pressing ahead with this change the Committee recommends that the impact of the change should be monitored Other recommendations include that the Maritime and Coastguard Agency should broaden its safety inspection programme so that it undertakes eight inspections per annum ports should be required to publish statistics on accidents and near misses the Government should use its influence to persuade harbour authorities to accept national standards as to who can be authorised as a pilot if national standards are not adopted the case for legislation on this issue will be compelling
