Out of Work Richard K. Vedder, Lowell E. Gallaway, 1997-07-01. Argues the cause of unemployment may be the government itself. Redefining the way we think about unemployment in America today. *Out of Work* offers devastating evidence that the major cause of high unemployment in the United States is the government itself.

*Eternal Vigilance* Ralph L. Bayrer, 2020-03-19. Your argument of how to protect the goose that laid the golden egg by defending freedom, civil society and capitalism from the pernicious effects of Progressivism seems compelling to me. Moreover, your account of the rise of progressivism in the U.S. is must reading for anyone who would take a stand on political issues. And no one who reads your accounts of the rise and fall of free people, free market models of government in other societies can fail to agree with you about the value of government allowing the market to operate as freely as possible. It is a very informative summary of an enormous amount of data that I have not seen elsewhere and a powerful empirical argument.

**Markets against Modernity** Ryan H. Murphy, 2019-11-08 In *Markets Against Modernity* economist Ryan Murphy documents a clear continuity between the systematic errors people make in their personal lives and the gaps between public opinion and informed opinion These errors cluster around specific divergences between how the modern world's institutions function including global markets pluralistic democracy and even science itself and how evolution trained our brains to understand the nature of economic relationships social relationships and humanity's relationship to the physical world Murphy calls these systematic divergences Ecological Irrationality Exploring them leads him to even more prickly questions and to conclusions that may challenge the beliefs of those who understand that for instance modern vaccines are safe and effective Do we actually want a less cohesive society Is doing a task yourself financially prudent And if we recognize an expert consensus is there even a way to implement it and achieve the desired effects

Stapleford,2002-01-01 Self interest economic efficiency and

private property rights are among the most basic assumptions of market economics But can an economic theory built on these assumptions alone provide adequate insight into human nature motivation and ultimate goals to guide our economic life John Stapleford says no along with those economists who recognize the limits of their discipline He insightfully shows us in detail how ethics are inextricably intertwined with economic life and analysis Writing from a Christian ethical perspective he interacts with seven standard introductory economics texts exploring the moral challenges imbedded in various macro micro and international economic theories and outlining a faithful response to them Among the important ethical issues addressed are possibilities and perils of economic growth the role of government in the economy the growth of work and loss

of leisure lending and borrowing poverty and distributive justice environmental stewardship business and social responsibility legalized gambling the pornography industry debt relief for less developed countries the economics of immigration population control Keyed to seven of the most widely used introductory economics texts Gwartney Stroup and Sobel Mankiw Mansfield and Behravesch McConnell and Brue Miller Samuelson and Nordhaus and Stiglitz this book will be especially useful for introductory courses in economics     Economics in the News Saul Pleeter,1993     **Fighting the Diseases of Poverty** Philip Stevens,2017-07-05 Public discussion of global healthcare issues is dominated by those who believe that top down government driven interventions are the solution to the myriad health problems suffered by people in less developed countries This thinking is responsible for a plethora of harmful policies ranging from a drive towards socialized healthcare systems to calls for the centralization and semi nationalization of pharmaceutical research and development to impractical but grandiose UN sponsored schemes for tackling HIV AIDS and malaria In spite of the abysmal track record of top down approaches non governmental organizations and UN agencies continue to promote them to the detriment of the private sector economic development and human health The resulting politicization of diseases such as HIV AIDS has led to a diversion of resources away from more easily treatable diseases that affect more people Meanwhile cost effective and simple interventions such as vaccination are being subordinated to other more politically correct diseases This centralizing mindset has also resulted in many governments in less developed countries attempting to plan and control universal healthcare systems which has encouraged rationing inequitable access and entrenched corruption It has also seriously undermined the effectiveness of overseas development aid Moreover the politicization of diseases such as HIV AIDS has led to a diversion of resources away from more easily treatable diseases that affect more people As a result cost effective and simple interventions are neglected by donors There has to date been little public discussion of the role of markets and their underlying institutions property rights and the rule of law in improving human health Economic growth and globalization has led to unprecedented improvements in human health The challenge is to enable the poorest countries to take part more fully in this process This work demonstrates how current
