transportation The authors provide a large variety of perspectives from economics to technical realization With the focus on
such heavy lift cargo UAS the authors consider recently established methods for approval and certification which they expect
to be disruptive for unmanned aviation In particular the Specific Operations Risk Assessment SORA and its impact on the
presented technological solutions and operational concepts are studied Starting with the assumption of an operation over
sparsely populated areas and below common air traffic diverse measures to further reduce operational risks are proposed
Operational concepts derived from logistics use cases set the context for an in depth analysis including aircraft and system
design safe autonomy as well as airspace integration and datalinks Results from simulations and technology demonstrations
are presented as a proof of concept for solutions proposed in this book Sport Aviation and the Experimenter ,1994
