Constructions of Media Authorship Christiane Heibach, Angela Krewani, Irene Schütze, 2020-11-23 The author is dead long live the author This paradox has shaped discussions on authorship since at least the 1960s when the dominant notion of the individual author genius was first critically questioned The ongoing discussion has mainly focused on literature and the arts but has ignored nearly any artistic practice beyond these two fields Constructions of Media Authorship aims to fill this gap the volume's interdisciplinary contributions reflect historical and current artistic practices within various media and attempt to grasp them from different perspectives The first part sheds a new light on different artistic and design practices and questions the still dominant view on the individual identifiable author The second part discusses creative practices in literature emphasizing the interrelation of aesthetic discourses and media practices The third part investigates authoring in audiovisual media especially film and TV while the final part turns to electronic and digital media and their collective creativity and hybrid mediality The volume is also an attempt to develop new methodological approaches focusing on the interplay between various human and non human actors in different media constellations

Rachel Harrison Life Hack Elisabeth Sussman, David Joselit, 2019-01-01 The work of the sculptor Rachel Harrison is both the zeitgeist and the least digestible in contemporary art It may also be the most important owing to an originality that breaks a prevalent spell in an art world of recycled genres styles and ideas Peter Schjeldahl *The New Yorker* In her sculptures room sized installations drawings photographs and artist's books Rachel Harrison b 1966 delves into themes of celebrity culture pop psychology history and politics This publication created in close collaboration with the artist explores twenty five years of

her practice and is the first comprehensive monograph on Harrison in nearly a decade. Its centerpiece is an in-depth plate section which doubles as a chronology of Harrison's major works, series and exhibitions. Objects are illustrated with multiple views and details and accompanied by short texts. This thorough approach elucidates Harrison's complicated eclectic oeuvre in which she integrates found materials with handmade sculptural elements, upends traditions of museum display and injects quotidian objects with a sense of strangeness. Six accompanying essays cover Harrison's earliest works to her most recent output. The book also includes a handful of photo collages that the artist created specifically for this project. Published here for the first time, these pieces superimpose found images with reproductions of Harrison's own past work.

Hactivism and Cyberwars Tim Jordan, Paul A. Taylor, 2004. As global society becomes more and more dependent politically and economically on the flow of information, the power of those who can disrupt and manipulate that flow also increases. In *Hactivism and Cyberwars*, Tim Jordan and Paul Taylor provide a detailed history of hacktivism's evolution from early hacking culture to its present-day status as the radical face of online politics. They describe the ways in which hacktivism has reappropriated hacking techniques to create an innovative new form of political protest. A full explanation is given of the different strands of hacktivism and the cyberwars it has created, ranging from such avant-garde groups as the Electronic Disturbance Theatre to more virtually focused groups labelled 'The Digitally Correct'. The full social and historical context of hacktivism is portrayed, taking into account its position in terms of new social movements, direct action and its contribution to the globalization debate. This book provides an important corrective flip side to mainstream accounts of E-commerce and broadens the conceptualization of the internet to take into full account the other side of the digital divide.

Digital Leisure Cultures Sandro Carnicelli, David McGillivray, Gayle McPherson, 2016-08-12. The digital turn in leisure has opened up a vast array of new opportunities to play, learn, participate and be entertained, opportunities that have transformed what we recognise as leisure. This edited collection provides a significant contribution to our changing understanding of digital leisure cultures, reflecting on the socio-historical context within which the digital age emerged while engaging with new debates about the evolving and controversial role of digital platforms in contemporary leisure cultures. This book also demonstrates the interdisciplinary nature of studying digital leisure cultures. To make sense of how individuals and institutions use digital spaces, it is necessary to draw on history, science and technology, philosophy, cultural studies, sociology and geography, as well as sport and leisure studies. This important and timely study discusses both the promise of the digital sphere as a realm of liberation and the darker side of the internet associated with control, surveillance, exclusion and dehumanisation. *Digital Leisure Cultures* is fascinating reading for any student or scholar of sociology, sport and leisure studies, geography or media studies.
