**The Carbon Buster's Home Energy Handbook** Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology The Carbon Buster's Home Energy Handbook describes how to achieve this goal in the residential field The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook It provides answers to questions such as Which measure is more effective putting solar panels on your roof or buying a hybrid car Where do I need to invest first in high efficiency shower heads or solar tubes Is a 500 fridge that uses 800 kWh of power per year a good buy The book allows individuals to quickly and accurately assess which products are a good deal and which aren't It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns yielding results that are often surprising The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol At the same time readers implementing the recommendations will save an average of 15 000 in energy costs over the next five years

Plug-in Electric Car Buyers Buying Guide , *Climate Change and Tourism* Susanne Becken, John Hay, 2012-06-25 The contribution of tourism to climate change and the likely consequences of climate change for key tourist destinations has been well reported and discussed Yet there is a lack of evidence based systematic practical advice as to how the tourism industry should respond to the challenge of climate change Building on a sound conceptual understanding of the links between climate change and tourism this book shows how the tourism sector might best respond It not only focuses on the roles of supportive policies and institutions in ensuring a strong enabling environment for practical responses but also on the practical responses themselves This practical approach is presented through a large number of case studies and examples which illustrate how policy and industry initiatives have been implemented in tourism and if or why they were successful The majority of examples come from places such as the Caribbean Spain the Maldives Nepal and the UK as well as Australia New Zealand and other parts of the Pacific The examples are presented within an overall framework that facilitates the translation of adaptation and mitigation policies into practice This book offers the tourism industry students and academics the opportunity to advance from the earlier more conceptual texts on tourism and climate change by taking a much more practical approach Its global coverage through the use of international case studies fosters a cross fertilisation of ideas and initiatives This text provides a detailed analysis of best practices in the face of climate change across countries and geographically diverse tourist destinations and operations Electric Vehicles Seref Soylu, 2011-09-06 In this book theoretical basis and design guidelines for electric vehicles have been emphasized chapter by chapter with valuable contribution of many researchers who work on both technical and regulatory sides of the field Multidisciplinary research
