Field-proven, long-life
blowout prevention

Pressure Control Equipment: Blowout Preventers

Applications & benefits

The Hydril Pressure Control GL® annular BOP has a field-tested, field-proven design. It has demonstrated world-class dependability and quality to users for over 30 years. As with all our BOPs, we test every GL's operating chambers and packing unit to full BOP working pressure to ensure strength, reliability, and the ability to over-pressurize the chambers in emergencies. Special and proven features like these are the reason why customers have come to expect reliable performance, closure after closure.

Key features

The key to the GL's excellent performance lies in its unique design, which includes:

- A Hydril Pressure Control packing unit that is specially molded with two different styles of inserts to reduce closing volume and increase closing cycles
- A replaceable wear plate that eliminates metal-to-metal contact between the packing unit inserts and the BOP head
- A piston design that provides complete balance, more reliable operation and ease of assembly
- A latched head for fast, easy access to the packing unit and wear seals
- An opening chamber head that prevents debris from falling into the chambers when replacing the packing unit

- A bolted-in inner sleeve that is field replaceable
- Corrosion-resistant alloy for the ring grooves
- SermGuard™ coating on all internal surfaces
- Packing units with nitrile or natural compounds
- Off-the-shelf deliveries of packing units for minimal lead time
