Scientific and Technical Books and Serials in Print , 1984 **Fast and Accurate Finite-Element Multigrid Solvers for PDE Simulations on GPU Clusters** Dominik GÖddeke, 2011 This dissertation demonstrates that graphics processors

GPUs as representatives of emerging many core architectures are very well suited for the fast and accurate solution of large sparse linear systems of equations using parallel multigrid methods on heterogeneous compute clusters. Such systems arise for instance in the discretisation of elliptic partial differential equations with finite elements. Fine granular parallelisation techniques and methods to ensure accuracy are developed that enable at least one order of magnitude speedup over highly tuned conventional CPU implementations without sacrificing neither accuracy nor functionality.
