**Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists** Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment. Methods of data collection e.g. observation, interview, standardised testing and sources e.g. self report, proxy for collecting information about clients are then reviewed and the main purposes of assessment e.g. descriptive, evaluative, predictive, discriminative presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed. *Handbook of Neuropsychology and Aging* Paul David Nussbaum, 2013-11-11 Leaders in neuropsychology, behavioral neurology, speech and language science, neuropsychiatry and many other disciplines contribute to this volume, the first comprehensive review of knowledge in the field. They discuss a wide range of disorders including areas of recent research such as frontal lobe dementias and the neuropsychological aspects of late life depression and clinical problems typically given insufficient consideration in other works such as seizure disorder, head injury and mental retardation. Normal aging is also covered in detail and assessment procedures and clinical interventions are given thorough treatment. Other highlights include discussions of guardianship and caregiving, personality and behavior, psychotic disorders, Alzheimer's and head trauma. *Adult Physical Conditions* Amy J. Mahle, Amber L. Ward, 2022-03-01 The go-to resource for class, clinical and practice, now in full color. A team of noted OTA and OT leaders and educators deliver practical in-depth coverage of the most common adult physical conditions and the corresponding evidence-based occupational therapy interventions. The authors blend theory and foundational knowledge with practical applications to OTA interventions and client-centered practice. This approach helps students develop the critical thinking and clinical reasoning skills that are the foundation for professional knowledge, able, creative and competent practitioners. New Updated Content that incorporates language from the 4th Edition of the Occupational Therapy Practice Framework and aligns with the latest ACOTE standards. New Updated Full color contemporary photographs that reflect real clients and OT practitioners in diverse practice settings. New Chapters: Occupational Justice for Diverse and Marginalized Populations, Motor Control and Neurotherapeutic Approaches, Sexual Activity and Intimacy, Dementia Understanding and Management and The Influence of Aging on Occupational Performance. Evidence Based Practice highlights recent research articles relevant to topics in each chapter.
