Balancing Structural Power Samuel Schlichting, 2025-07-16 Great power politics has returned to the global stage. It leads to complex balancing games among the leading countries of the world not only in terms of military power but also with regard to resources, productive capacities, infrastructure, and narratives. For Eurasia, China's phenomenal rise is a political game changer. Against the background of the Belt and Road Initiative (BRI) and China's ever-increasing presence in the former post-Soviet region of Central Asia, this book develops the concept of Structural Power to adopt International Relations theory to the empirical reality of great power politics in the early 21st century. **Global Health Challenges and Innovations**

of Functions by the Transition Authority Kenya. Transition Authority, 2015. **True to Their Salt** Rob Johnson, 2017-10-12 In the last decade, an Iraqi Army and an Afghan National Army were created entirely from scratch; the founding of which was deemed to be a crucial measure for the establishment of security and the withdrawal of Western forces from Iraq and Afghanistan. Raising new armies is always problematic, especially during an insurgency, but doing so outside the sovereignty of one's own state raises questions of legality, concerns about their conduct, and the risk of an over-empowered local military. The recruitment of proxies, including former insurgents or the arming of local fighters and auxiliaries, levies, and militias may also exacerbate an internal security situation. In seeking answers to this conundrum, Rob Johnson turns to history. His book sets out how recruitment of local auxiliaries was an essential component of European colonialism and how, in the transfer of power and security at the end of that colonial era, the raising of local forces using existing Western models became the norm. He then offers a comprehensive survey of the post-colonial legacy, particularly the recent utilisation of surrogates and auxiliaries, the work of embedded training teams, and mentoring.
