Emphasis on discourse, critical pedagogy, and ethnicity are among the many aspects of methodology and educational change emphasized by the contributors.

Agent of Democracy David W. Brown, Deborah Witte, 2008 The professional mind set prevailing in higher education today often ignores the common goods that only democratic self-rule can provide. Why? Some say the professional mind set is profoundly antidemocratic, especially when it presumes that specialized knowledge and experience is a sufficient substitute for a democratic process of participating equals. Although there are currently many higher education experiments in which the public does set the agenda for research and actually conducts much of the work, there are still too many projects ostensibly done for the public with nothing to be done by the public. How then can the academy, with such a mind set and its preoccupation with hustling prospective students and chasing after academic luminaries, be of any help in renewing democratic practices?
