Education Law, Strategic Policy and Sustainable Development in Africa A.C Onuora-Oguno, W.O. Egbewole, T.E. Kleven, 2017-07-06 This book outlines the findings and suggestions of the Law and Society Association's International Research Collaborations which focused on the African Union's Agenda 2063. This outlined the ideal Africa aspired to by the year 2063, the Africa we want. The authors examine socio-economic rights issues and their impact on developing a strong educational agenda that can drive Africa to realize Agenda 2063. As Africa's development has remained slow in the face of many challenges, the need to embrace good governance, rule of law and human rights obligations are major tools to realize the continent's potential. The project focuses in particular on the central place of education law and policy in achieving the goals of Agenda 2063.

Sustainable Agricultural Mechanization: A Framework for Africa Food and Agriculture Organization of the United Nations, African Union, 2019-03-13 This framework presents ten interrelated principles/elements to guide Sustainable Agricultural Mechanization in Africa. SAMA Further it presents the technical issues to be considered under SAMA and the options to be analysed at the country and sub-regional levels. The ten key elements required in a framework for SAMA are as follows. The analysis in the framework calls for a specific approach involving learning from other parts of the world where significant transformation of the agricultural mechanization sector has already occurred within a three to four decade time frame and developing policies and programmes to realize Africa's aspirations of Zero Hunger by 2025. This approach entails the identification and prioritization of relevant and interrelated elements to help countries develop strategies and practical development plans that create synergies in line with their agricultural transformation plans. Given the unique characteristics of each country and the diverse needs of Africa due to the ecological heterogeneity and the wide range of farm sizes, the framework avoids being prescriptive.

Biodiversity of Angola Brian J. Huntley, Vladimir Russo, Fernanda Lages, Nuno Ferrand, 2019-02-20 This open access multi-authored book presents a state of the science synthesis of knowledge on the biodiversity of Angola based on sources in peer-reviewed journals, in books and where appropriate unpublished official reports. The book identifies Angola as one of the most biologically diverse countries in Africa but notes that its fauna, flora, habitats and the processes that drive the dynamics of its ecosystems are still very poorly researched and documented. This state of the science synthesis is for the use of all students of Angola's biodiversity and for those responsible for the planning, development and sustainable management of the country's living resources. The volume brings together the results of expeditions and research undertaken in Angola since the late eighteenth century with emphasis on work conducted in the four decades since Angola's independence in 1975. The individual chapters have been written by leaders in their fields and reviewed by peers familiar with the region.
