English Learners' Access to Postsecondary Education

Yasuko Kanno, 2021-09-09. Why does a public high school, despite having resources and educators with good intentions, end up graduating English learners (ELs) without preparing them for college and career? This book answers this question through a longitudinal ethnographic case study of a diverse high school in Pennsylvania. The author takes the reader on a journey with seven EL students through their last two years of high school, exploring how and why none of them reached the postsecondary destinations they originally aspired to. This book provides a sobering look into the systemic undereducation of high school ELs and the role of high schools in limiting their postsecondary options.

educational change *The Oxford Handbook of Adolescent Substance Abuse* Robert A. Zucker, Sandra A. Brown, 2019-08-01 Adolescent substance abuse is the nation's 1 public health problem. It originates out of a developmental era where experimentation with the world is increasingly taking place and where major changes in physical self and social relationships are taking place. These changes cannot be understood by any one discipline nor can they be described by focusing only on the behavioral and social problems of this age period, the characteristics of normal development, or the pharmacology and addictive potential of specific drugs. They require knowledge of the brain's systems of reward and control, genetics, psychopharmacology, personality, child development, psychopathology, family dynamics, peer group relationships, culture, social policy, and more. Drawing on the expertise of the leading researchers in this field, this Handbook provides the most comprehensive summarization of current knowledge about adolescent substance abuse. The Handbook is organized into eight sections covering the literature on the developmental context of this life period, the epidemiology of adolescent use and abuse, similarities and differences in use, addictive potential and consequences of use for different drugs, etiology and course as characterized at different levels of mechanistic analysis ranging from the genetic and neural to the behavioural and social. Two sections cover the clinical ramifications of abuse and prevention and intervention strategies to most effectively deal with these problems. The Handbook's last section addresses the role of social policy in framing the problem in addressing it and explores its potential role in alleviating it. *Handbook of Research on Digital Content, Mobile Learning, and Technology Integration Models in Teacher Education* Keengwe, Jared, 2017-07-13 While many facets of our lives are rapidly becoming more digital, educational institutions are now faced with the task of finding new and innovative ways to incorporate technology into the classroom.
