Abject poverty and official corruption make parts of Africa a very attractive destination for terrorist organizations. This comprehensive volume provides an extensive examination of major terrorist events in Africa. It highlights internal and external indices to illustrate why Africa is so ripe for terrorism, ostensibly in terms of recruitment as well as attainment and sources of funding due to the continent's continuing poverty and corruption. Searching for a Demon Steven M. Chermak,2002 This provocative volume thoroughly examines the ways in which the media demonized militia groups following the devastating bombing of the Alfred F Murrah building in Oklahoma City Using quantitative and qualitative research methods Steven M Chermak offers a fresh perspective on how news coverage and popular entertainment transformed a largely overlooked movement into a symbol for this new threat of domestic terrorism and ignited a national panic over the militia menace *Searching for a Demon* describes the representation of the militia movement in the news media editorial cartoons films and television Chermak delves into such topics as the type and amount of coverage after the blast how social problems are constructed in the news the motivations and biases of authoritative or celebrity figures used as news sources and why images of militias were framed in specific ways Chermak balances his account with an in depth look at the philosophies activities and

strategies of militia groups Drawing on extensive interviews he conducted at gun shows and preparedness exhibitions the author compares and contrasts media depictions of militia life and ideology with the firsthand accounts of members and leaders themselves and he assesses how media coverage affected changes in the movement In conclusion Chermak discusses the parallels between media treatment of militias in the wake of the Oklahoma City bombing and the coverage of the al Qaeda terrorist network after the September 11 2001 attacks Solidly grounded in social constructionist theory Searching for a Demon fills a significant gap in the literature on terrorism as well as on the roles of the news media and popular culture in reshaping the public consciousness after dramatic crimes

Terrorism and the State William Perdue, 1989-08-07

Terrorism and the State is a volume on the political economy of terrorism Emphasizing the role of ideological systems in the definition of political violence this book is theoretical historical and critical It first presents and refutes the two most commonly expressed definitions of terrorism the absolutist view a simplistic picture of international deviance on the part of fanatics and the liberal relativistic view one man s terrorist is another man s freedom fighter Both views focus on the definition of behaviors rather than on the real relations of domination and subjugation embodied in the social structure Neither view can be used as a vehicle when analyzing institutionalized forces of domination through fear The author suggests that there is presently a double standard of terrorism one for the state and the other for its opponents Terrorism and the State reframes the terrorism debate A historical review supports a revisionist position that places the issue in the context of global relations Attention is given to the role of the media in the selective selling of international terrorism Having established his framework the author proceeds through the investigation of historically grounded cases to systematically analyze state terrorism the coercive power of today s nuclear weapon state global apartheid terrorism settler terrorism holy
