Kathleen Heid, Patricia S. Wilson, Glendon W. Blume, 2015-12-01 A perennial discussion about teacher development is the optimal content background for teachers In recent years that discussion has taken center stage in the work of mathematics education researchers mathematicians mathematics professional developers and mathematics education policymakers Much of the existing and prior work in this area has been directed toward mathematical knowledge for teaching at the elementary level The work described in this volume takes a sometimes neglected approach focusing on the dynamic nature of mathematical understanding rather than on a stable description of mathematical knowledge and on mathematics for secondary teaching rather than mathematics for teaching at the elementary level The work reported in *Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations* is a practice based response to the question of what mathematical understandings secondary teachers could productively use in their teaching For each of more than 50 events our team of almost 50 mathematics educators who were experienced mathematics teachers developed descriptions of the mathematics that teachers could use each of those descriptions consisting of the event and the mathematics related to the event is what we call a Situation We developed our Framework for *Mathematical Understanding for Secondary Teaching MUST* based on an analysis of our entire set of Situations We call the work practice based because the MUST framework is based on actual events that we witnessed in our observations of

secondary mathematics practice Groups of mathematics teachers can use this volume to enhance their own understandings of secondary mathematics School leaders and professional developers in secondary mathematics will find our MUST Framework and Situations useful as they work with teachers in enhancing and deepening their understanding of secondary mathematics Mathematics teacher educators and mathematicians who teach mathematics to prospective and in service secondary teachers will be able to couch their mathematical discussions in the Situations examples that arise from secondary mathematics classrooms They will be able to use this volume as they design courses and programs that enhance mathematics from the perspectives identified in the MUST framework Policymakers and researchers can use our MUST framework as they consider the mathematics background needed by teachers

A Distant Place Mark F. Harris, 2002 This book is a compilation of the 230 best student essays submitted in English composition classes at the Teachers College of Qingdao University in Qingdao Shandong P R China during the spring semester of 2000 The stories were submitted to fulfill assignments given by American instructor Mark F Harris for his students to write about their grandparents parents family life and some of their own childhood and school experiences as well as to contemplate the future In doing research for the essays a few of the students had the good fortune to interview their grandparents while many more were able to question their parents They wrote about times of hardship sacrifice and deprivation They gave brief but graphic accounts of the Japanese invasion and occupation of China the War of Liberation and the founding of modern China the Cultural Revolution and of hardships associated with famine and poverty Some of the essays described the common relationships that exist in the traditional Chinese family In writing about themselves most students related memorable events of their normal carefree childhood They also mentioned encountering frustrations in their growing up and changing years and of competing with classmates in school activities Almost universally they wrote about the challenge of preparing for and passing the university entrance examination Many essays conveyed messages portraying strong cultural values such as honesty perseverance loyalty devotion justice and responsibility Stories depicting situations of great seriousness are balanced with those reflecting childhood innocence and humor The students wrote in English which is their second language Mr Harris quickly learned there was a unique style to their Chinese English They were able to superimpose English over their Chinese language and thought patterns resulting in writing with less precision and exactness when compared to American usage Yet beautiful imagery and poetic expressions seemed to flow naturally Even though the reader may have no knowledge of the Chinese language most probably he will unknowingly be reading Chinese when studying these essays A good example of this beautiful language is expressed in an essay by Liu Ranji James who concluded that a distant place is not only a concept of space it is a higher pursuit in spirit The pursuit will be endless since a distant place is like a beacon that guides my journey in life The title of the book comes from this essay since the pursuit described by the writer in many ways parallels the author s pursuit even in traveling to a distant place called China This timely collection of essays written by some of China s brightest young

people gives clear insight into a way of life that properly needs to be recorded **Master the SSAT/ISEE**
