

1. Neutral the hand brake

The easiest way to move the vehicle into gear and prevent problems of gear slippage is with parking. As discussed in the previous chapter, to ensure this gear, depress the button in the handle of the selector lever (labeled **N** in the next chapter) and move the gearstick into gear.

After manually disengaging the vehicle and with the gear in the correct position, ensure the footbrake, handbrake and release mechanism are kept in functioning condition.

An "uphill and away method" where the handbrake is used.

Roll-down device

The roll-down device gives movement to the selector when the selector lever is moved down past the full service position (labeled **R** in the next chapter) and engine starts. The gear is then shifted forward (labeled **D** in the next chapter) and the selector lever is moved down past the full service position.

WARNING

Be careful when using the roll-down on slippery roads. Rapid acceleration may cause skidding.

Driving the Automatic transmission**Starting the engine**

The selector lever must be in **N** (Neutral) or **P** (Park) if one of the driving positions is engaged. Unless the vehicle is in gear, the engine will not start.

Selecting a driving position**WARNING**

When the selector lever is in a driving position, the vehicle may move past its stop point if the engine starts. Do not release the parking brake or footbrake until the vehicle is ready to move. Release pressure is transmitted to the vehicle as soon as a driving position is selected.

If the engine must be running, remember any driving position engaged when selecting another. Make sure the selector lever is correctly locked into the **P** position with the parking brake fully set. Otherwise, the tendency to go back toward gear and the vehicle is unstable, even with the parking brake applied.

Do not accelerate while selecting a driving position. At the time the engine must run in all cases, the shift and release pressure will be placed on the automatic clutch in the transmission.

If the selector lever is incorrectly moved into **R** (Reverse) while you are driving, take your foot off the accelerator pedal and wait for the speed before selecting a driving position.

Never shift into **R** (Reverse) or **P** (Park) when the vehicle is in motion.

**Putting off**

Put the gear in **P** (Park) and engage the gear change. The gear will be set. The vehicle will move forward.

Shifting off

When shifting between forward **D** and reverse **R**, the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

Shift to drive, road or lane

When shifting between forward **D** and reverse **R**, the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

WARNING

When shifting to drive, road, lane or lane, for example, the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

Do not expect "locking" both and both will always opening in high engine speed and lower throttle. In the vehicle design, the vehicle will move forward.

Putting

When **P** (Park) is selected, the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

When the vehicle is in **P** (Park), the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

When the vehicle is in **P** (Park), the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

When the vehicle is in **P** (Park), the vehicle will move forward. The vehicle will move forward. The vehicle will move forward.

WARNING
