An Autoethnography of Teaching English in Japan: Bridging Life and Academia Sanae Oda-Sheehan ,2022-01-20

Based on her professional and personal experiences in education as well as in business Sanae Oda Sheehan PhD came to realize that there may be several problematic gaps hindering learning effectiveness in the Japanese EFL context In exploring possibilities to bridge those gaps she proposes the framework called the Pedagogical Trinity the integration of L2 pragmatics and grammar pedagogy to promote the implementation of communicative language teaching This book shares her experiences in exploring how to bring about such integration and bridge those gaps by utilizing autoethnography Autoethnography is a burgeoning and promising approach in the qualitative research field in which researchers use themselves as the research subject to better understand sociocultural complexities through the connectivity between self and others By employing the autoethnographic approach and analyzing in depth face to face interviews and journal entries Oda Sheehan reflected on her teaching practices and her own identity formation to explore the critical factors for the integrative approach Through this life sized portrait of the research project she obtained interpretive insights that show how critical it is for teachers to have an awareness of their multiple identities and perspectives long term visions and readiness for necessary transformation This book meticulously crafts and demonstrates how autoethnography can be utilized as a research method to merge analytic rigor and creative dynamics Through the connectivity in an autoethnographic orientation readers may find themselves in the stories unfolded in the chapters and be guided to reflect on their own experiences and endeavors In that way what is presented in this book may become readers own stories giving them the strength to go forward in life This book can provide a platform of open dialogue to explore approaches to bridge life and academia collaboratively *A Grammar of the Classical Arabic Language ...* Mortimer Sloper Howell,1986 Requirements for Admission to the Freshman English Course (English I) University of Wisconsin. Department of English,1913 **Code 1889. Arnold's 'practical' examination tests in arithmetic and grammar, with spelling lists. Standard ii-vii [With] Answers. Standard iv(v,vii).** Arnold E.J. and son, ltd,E. J. Arnold & Son, Ltd,1890 **New Directions in Psychological Anthropology** Theodore Schwartz,Geoffrey M. White,Catherine A. Lutz,1992 The field of psychological anthropology has changed a great deal since the 1940s and 1950s when it was often known as Culture and Personality Studies Rooted in psychoanalytic psychology its early practitioners sought to extend that psychology through the study of cross cultural variation in personality and child rearing practices Psychological anthropology has since developed in a number of new directions Tensions between individual experience and collective meanings remain as central to the field as they were fifty years ago but alongside fresh versions of the psychoanalytic approach other approaches to the study of cognition emotion the body and the very nature of subjectivity have been introduced And in the place of an earlier tendency to treat a culture as an undifferentiated whole psychological anthropology now recognizes the complex internal structure of cultures The contributors to this state of the art collection are

all leading figures in contemporary psychological anthropology and they write about recent developments in the field

Sections of the book discuss cognition developmental psychology biology psychiatry and psychoanalysis areas that have always been integral to psychological anthropology but which are now being transformed by new perspectives on the body meaning agency and communicative practice

Keeping Mozart in Mind Gordon L. Shaw, 2003-11-19 The demand for math and science skills in our technology driven world is at a premium and yet U S students continue to lag behind many other industrialized countries in these areas This book based on studies conducted on 8000 elementary school aged children proposes that not only is there a relationship between music and math comprehension but that music can be utilized to heighten higher brain function and improve math skills The enclosed CD Rom includes 1 a recording of Allegro con spirito from Sonata for Two Pianos in D Major K 448 by Wolfgang Amadeus Mozart performed by Murray Perahia and Radu Lupu courtesy of Sony Classical™ and 2 a descriptive interactive version of S T A R™ Spatial Temporal Animation Reasoning software program While this book's discussion of the breakthroughs in understanding of spatial temporal reasoning abilities will be of particular interest to neuroscientists and cognitive researchers the book is also accessible to parents and educators Presents the theory that music exercises higher brain function and can enhance math comprehension Details how music training coupled with special temporal reasoning thinking in pictures can dramatically impact a child's ability to understand and master math Includes an interactive CD ROM with math games

Turning the Tide Earl H. Tilford, 2014-01-31

Turning the Tide is an institutional and cultural history of a dramatic decade of change at the University of Alabama set against the backdrop of desegregation the continuing civil rights struggle and the growing antiwar movement This book documents the period when a handful of University of Alabama student activists formed an alliance with President Frank A Rose his staff and a small group of progressive minded professors in order to transform the university during a time of social and political turmoil Together they engaged in a struggle against Governor George Wallace and a state legislature that reflected the worst aspects of racism in a state where the passage of civil rights legislation in 1964 and 1965 did little to reduce segregation and much to inflame the fears and passions of many white Alabamians Earl H Tilford details the origins of the student movement from within the Student Government Association whose leaders included Ralph Knowles and future

governor Don Siegelman among others the participation of key members of The Machine the political faction made up of the powerful fraternities and sororities on campus and the efforts of more radical non Greek students like Jack Drake Ed Still and Sondra Nesmith Tilford also details the political maneuverings that drove the cause of social change through multiple administrations at the university Turning the Tide highlights the contributions of university presidents Frank A Rose and David Mathews as well as administrators like the dean of men John L Blackburn who supported the student leaders but also encouraged them to work within the system rather than against it Based on archival research interviews with many of the principal participants and the author s personal experiences Tilford s Turning the Tide is a compelling portrait of a university in transition during the turbulence surrounding the civil rights and anti war movements of the 1960s

What It All Means Philippe Schlenker,2022-11-22 How meaning works from monkey calls to human language from spoken language to sign language from gestures to music and how meaning is connected to truth We communicate through language connecting what we mean to the words we say But humans convey meaning in other ways as well with facial expressions hand gestures and other methods Animals too can get their meanings across without words In *What It All Means* linguist Philippe Schlenker explains how meaning works from monkey calls to human language from spoken language to sign language from gestures to music He shows that these extraordinarily diverse types of meaning can be studied and compared within a unified approach one in which the notion of truth plays a central role It s just semantics is often said dismissively But Schlenker shows that semantics the study of meaning is an unsung success of modern linguistics a way to investigate some of the deepest questions about human nature using tools from the empirical and formal sciences Drawing on fifty years of research in formal semantics Schlenker traces how meaning comes to life After investigating meaning in primate communication he explores how human meanings are built using in some cases sign languages as a guide to the workings of our inner logic machine Schlenker explores how these meanings can be enriched by iconicity in sign language and by gestures in spoken language and then turns to more abstract forms of iconicity to understand the meaning of music He concludes by examining paradoxes which being neither true nor false test the very limits of meaning
