Legal Protection and Sustainability of Chinese Investments in Africa Xiuli Han, 2022-08-26 This book attempts to illustrate the whole picture of international investment rule of law between China and African countries and find the way forward through combining theory and practice It is a book by a Chinese professor based on her long term research experience in the international investment law field and her African field work in person Its main feature is its well balanced thinking on the structure of investment international rule of law It should be the most comprehensive research on the international investment rule of law between China and African countries With the increase of Chinese investment in Africa

various discussions and viewpoints on Chinese investment in Africa have become striking. The purpose of this book is to explore systematically the protection and sustainability of Chinese investment under the concept and framework of the international investment rule of law so as to serve the sustainable development of Africa and China. For the purpose of this book, great importance is attached to the idea of the international rule of law and the international investment law with the function of rule of law adhered to. The conclusion of this book is that China should take proactive steps to protect Chinese investment in Africa and regulate Chinese overseas investors and their investments in addition to complying with the laws in the host states and thus make them conducive to African and Chinese sustainable development. However, the most significant issue is that China-Africa investment relations should be regulated by the evolving and specific international investment rule of law and the China-Africa international investment rule of law should conform to normative in form, support common sustainable development in value and reflect the social reality of China and Africa. For both researchers and students, it is an approach to understand international investment rule of law from a perspective of China and Africa. For those who are interested in China and Africa, it is a useful reference book.

Advancing Theory and Research in Widening

Participation Ellen Boeren, Nalita James, 2019-10-23 Issues of access social exclusion and widening participation dominate educational policy agendas and are a shared global challenge Participation in higher education and adult lifelong learning activities can be a life changing experience that opens up new opportunities However access remains unequal People from lower socio economic backgrounds those living in the most deprived areas and people from minority ethnic groups are underrepresented In this book we focus on how we can move the field of widening participation forward paying specific attention to the theories and methods we can use to better understand and tackle the problem of underrepresented groups in

post compulsory education and how individuals and institutions can be supported We argue that in order to make sense of these issues it is important to engage in both the findings of widening participation research and the theoretical foundations which underpin them This way alternative perspectives on the widening participation agenda and emerging research and policy can be explored from alternative perspectives This book was originally published as a special issue of Studies in Continuing Education
