## *Red Rag to a Bull*

### Teacher's Guide

**Grade Level:** 6-12

**Curriculum Focus:** Science

**Running Time:** 47 minutes

---

### Program Description

The MythBusters head to the rodeo for myths all about bulls. First, does the color red make bulls angry? Kari, Tory, and Grant test out three variables—color, movement, and the presence of humans—to find out what really makes a bull “see red.” Next, they investigate if a bull can be trusted in a china shop. Finally, Adam and Jamie explore the anatomy of a bullet to test myths on heat, pressure, and gunpowder.

---

### Learning Objectives

After viewing the program and participating in discussion, students will be able to:

- Describe how heat and pressure affect bullets;
  - Understand the importance of research before experimenting;
  - Know that media and popular culture are often the cause of myths;
  - Realize that bulls charge a moving object without preference to color;
  - Describe how science experiments drive scientific progress.
- 

### Classroom Connections

Before Jamie and Adam can conduct the Bullet in the Oven myth, they must figure out if an oven is bulletproof. Describe their findings.

List the four parts of a bullet and how each part works.

A popular misconception about bulls is that they are color-blind. However, bulls are dichromatic. What does this mean? Are humans dichromatic?

Why do bullets explode quickly in a campfire and not an oven?

**Becoming a Physical Education Teacher** Gary Stidder, 2015-02-11 Teaching physical education is a challenging but rewarding occupation. Finding a way into the profession can be a daunting task while regular changes in government policy can make it hard to stay up to date. This engaging new book explains the process of becoming and being a teacher of secondary school physical education from the various routes of entry into the profession to the realities of being a qualified PE teacher to the ways in which experienced teachers can become teacher educators and nurture the next generation. It combines rich personal accounts of teaching in and being taught physical education with practical advice for trainees, newly qualified teachers and established professionals with an emphasis throughout on the importance of critical self-reflection. The book begins by exploring the nature and purpose of physical education and examining the historical development of initial teacher training. It examines recent changes in training policy and curriculum and offers an overview of the various ways of becoming a PE teacher including the Post Graduate Certificate in Education (PGCE) and school and employment based routes. The book offers advice on what to expect at interview, meeting the standards for qualifying to teach and on how to survive the difficult first year as a newly qualified teacher. It also outlines the challenges and rewards of being a qualified teacher, mentor or curriculum leader as well as a teacher educator within higher education. Concise, helpful and filled with sensible insights based on real experiences of teaching physical education, *Becoming a Physical Education Teacher* is an essential read for anybody considering entering the profession or for students, trainees, newly qualified or experienced teachers wanting to understand better the process of becoming and being a successful PE teacher.

**Personalising Learning in Open-Plan Schools** Vaughan Prain, Peter Cox, Craig Deed, Debra Edwards, Cathleen Farrelly, Mary Keeffe, Valerie Lovejoy, Lucy Mow, Peter Sellings, Bruce Waldrup, 2015-11-03 How can widely acknowledged challenges facing regional secondary schools with high concentrations of low SES students, ineffectual curricula and poor levels of student engagement, attendance and wellbeing be addressed? In this book we report on key outcomes of the Bendigo Education Plan that aimed to improve the academic attainment and wellbeing of 3000 regional secondary students. This Plan entailed rebuilding four Years 7-10 colleges and developing a differentiated and personalised curriculum with teachers team-teaching in open-plan settings. We analyse how and why teachers and students adapted to these new practices. We focus on both generic changes in the schools around the use of ICTs and the organisation of the curriculum and on specific approaches to teaching and learning in English, mathematics, science, social studies and studio arts. This book provides research-based guidelines on how the curriculum can be renewed and enacted effectively in these and like schools. In analysing a large-scale attempt to address the challenge of making learning personalised and meaningful for this cohort of students, our book addresses larger questions about quality secondary curriculum and successful teacher professional learning support.

**Collecting for the Curriculum** Amy J. Catalano, 2015-09-28 If you're a librarian charged with collecting curriculum materials and children's literature to support

the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials

Stitt,1994 Recent studies show that either consciously or unconsciously teachers are not practicing gender equity in the classroom Boys are called on more in class than girls and are encouraged to pursue careers from which girls are excluded because they are thought to be less capable

Serious questions arise for educators and counselors in this time of increasing awareness of the implications of gender bias such as what comprises a gender fair education and how can gender equity become part of the classroom curriculum. Guidance counselors and teachers share an important responsibility in seeking answers to these questions in order to avoid limiting students' potential because of gender. To achieve this end, Beverly A. Stitt has compiled an annotated bibliography of hundreds of books, articles, videos, classroom activities, and curriculum and workshop guides to help provide the tools needed for educators to become more gender conscious and to develop a gender fair educational system. The bibliography is divided into twenty-three categories under the headings of Agriculture and Industry, Business, Career, Guidance, Communications, Computers, Discrimination, Displaced Homemakers, Reentry Women, Elementary Education, Family and Work Issues, Gender Role Stereotyping, History Home Economics, In-service Training, Legislation, Male Focus, Math and Science, Nontraditional Careers, Pregnant and Parenting Teens, Recruitment, Special Needs, Teaching, Vocational Education, and Women's Studies. Each entry's annotation provides a short description of the content, the age group to which the resource applies, and ordering information. The book concludes with an index in which entries are cross-referenced under various categories to further aid the reader's research.
