

Using Quotes in a Research Paper

Why Use Sources at All?

When writing a text that includes sources, you need to quote the sources you are working with. Writers use quotes for several reasons: to assert facts; as a voice that adds authority or color to an assertion being made; and most importantly, to avoid **plagiarism**.

Below are three different quotation formats and guidelines to follow when using them. The three quotation formats include **direct quotation**, **block quotation**, and **summary/paraphrase**.

Direct Quotations

What is a direct quote? A direct quote is an exact, word for word copy of the original source. For example, "In a paper analyzing primary sources such as literary works, you will use direct quotation extensively to illustrate and support your analysis" (Aaron 257). This quote comes from the source exactly as the author had written it. A direct quotation usually corresponds exactly to the source's spelling, capitalization and interior punctuation.

Direct quotes must use a lead-in or tag phrase. In other words, direct quotes must be attached to your own writing. If you look at the above direct quote, you will notice the phrase "For example," which is enough to satisfy the lead-in requirement. When attributing a quote to an author in your text, the following verbs will prove helpful: *notes, argues, observes, writes, emphasizes, says, reports, suggests, claims, and comments*. Generally speaking, you should cite the author by last name only – as Brand, not Michael Brand or Mr. Brand.

Using brackets and ellipses in direct quotations--Sometimes you may have to alter the direct quotation in order clarify any unclear pronoun usage (such as "he" or "she" – who are "they"?), to match the grammar of your lead-in sentence, or to eliminate unnecessary information. To change the grammar, wording, and to eliminate superfluous information, use what is called ellipses (three periods, ...) to indicate missing material, and brackets [] to indicate changed
