Example #3: Page # 103

Find the coordinates of the point that divides the join of $A(-6, 3)$ and $B(5, -2)$ in the ratio $2:3$.

(i) internally

(ii) externally

Sol

We use formula (for internally)

$$x = \frac{K_1 x_2 + K_2 x_1}{K_1 + K_2}, \quad y = \frac{K_1 y_2 + K_2 y_1}{K_1 + K_2}$$

$$A(-6, 3), \quad B(5, -2) \quad K_1 : K_2 = 2 : 3$$

$$x_1 = -6, \quad y_1 = 3, \quad x_2 = 5, \quad y_2 = -2, \quad k_1 = 2, \quad k_2 = 3$$

Let Required coordinate of point "P"

$$P(x, y) = \left(\frac{K_1 x_2 + K_2 x_1}{K_1 + K_2}, \frac{K_1 y_2 + K_2 y_1}{K_1 + K_2} \right)$$

$$x = ?$$

$$y = ?$$

$$x = \frac{K_1 x_2 + K_2 x_1}{K_1 + K_2}$$

$$x = \frac{(2)(5) + (3)(-6)}{2 + 3}$$

$$x = \frac{10 - 18}{5}$$

$$x = -\frac{8}{5}$$

$$y = \frac{K_1 y_2 + K_2 y_1}{K_1 + K_2}$$

$$y = \frac{(2)(-2) + (3)(3)}{2 + 3}$$

$$y = \frac{-4 + 9}{5}$$

$$y = \frac{5}{5}$$

$$y = 1$$

(ii) externally

We use formula

$$x = \frac{K_1 x_2 - K_2 x_1}{K_1 - K_2}, \quad y = \frac{K_1 y_2 - K_2 y_1}{K_1 - K_2}$$

$$x = \frac{(2)(5) - (3)(-6)}{2 - 3}, \quad y = \frac{(2)(-2) - (3)(3)}{2 - 3}$$

$$x = \frac{10 + 18}{-1}, \quad y = \frac{-4 - 9}{-1}$$

$$x = -\frac{28}{1}, \quad y = -\frac{13}{1}$$

$$x = -28, \quad y = 13$$

Ex #4.1

Q#1:- Describe the location in the plane of the point $P(x, y)$ for which

vii (i) $|x| = -|y|$

vii (ii) $|x| \geq 3$

ix (iii) $x > 2$ and $y = 2$

Sol $|x| = -|y|$

A positive value cannot equal to a negative value, except number zero, so location of point in the plane is at **origin**.

$$|x| \geq 3$$

$$\Rightarrow \pm x \geq 3$$

$$\Rightarrow +x \geq 3 \quad \text{or} \quad -x \geq 3$$

$$\Rightarrow x \geq 3 \quad \text{or} \quad x \leq -3$$

which is the set of points lying on right side of the line $x=3$ and the points lying on left side of the line $x=-3$

Essential Questions For Analytical Geometry:

Linear Algebra and Analytic Geometry Bennie Marsh & Frankie Murray, 2018-01-18 In this book the topics are presented in the same order as in the textbook The problems concern two content areas Linear Algebra and Analytical Geometry After reading this book a student should be able to solve linear equations and to perform the basic operations on numbers and algebraic expressions The Linear Algebra tests will reveal readers knowledge and skills readers abilities in interpreting symbols justifying statements and constructing proofs Readers should be able to apply the properties of determinants and matrix operations and solve linear systems of equations The Analytical Geometry topics include different forms of equations of straight lines and planes angles between simple figures the curves of the second order This book will prove definitive and ideal reference tool to research scholars academicians and educationists

Essential Questions Jay McTighe, Grant P. Wiggins, 2013 This book from the authors of *Understanding by Design* explores how to design and frame essential questions that prompt students to think deeply and create a more stimulating environment for learning

Basic Questions on Truth P. Weingartner, 2012-12-06 The task of the book is not to give a survey of the main theories on truth found in the literature There are several books available which do this The one of David for Deflationist and Disquotational Theories of Truth that of Chapuis for Revision Theories of Truth that of Kirkham for Correspondence Theories and several others that of Rescher for Coherence Theories of Truth Moreover the book is not an analysis just of Tarski's theory like that of Moreno or the respective chapters in Kirkham though Tarski's theory plays an important role in the whole work presented The task of the book is to give a detailed answer to some basic questions on truth which have been perennial problems through the centuries and are still discussed today The answer is given in the light of our knowledge today and with the help of modern logic But the book explicitly aims at connecting recent problems with related ones in the whole history of philosophy The method to incorporate important philosophers of the tradition into the analysis is that of disputation i.e. of putting some of their main thesis into objections or counterobjections pro or contra a positive answer to the respective question After the pros and cons are given a detailed answer to the question is proposed and finally commentaries and corrections are given to the objections and counterobjections in the light of the proposed answer

Geometric Aspects of Functional Analysis Ronen Eldan,Bo'az Klartag,Alexander Litvak,Emanuel Milman,2023-09-29 This book reflects general trends in the study of geometric aspects of functional analysis understood in a broad sense A classical theme in the local theory of Banach spaces is the study of probability measures in high dimension and the concentration of measure phenomenon Here this phenomenon is approached from different angles including through analysis on the Hamming cube and via quantitative estimates in the Central Limit Theorem under thin shell and related assumptions Classical convexity theory plays a central role in this volume as well as the study of geometric inequalities These inequalities which are somewhat in spirit of the Brunn Minkowski inequality in turn shed light on convexity and on the geometry of Euclidean space Probability measures with convexity or curvature properties such as log concave distributions occupy an equally central role and arise in the study of Gaussian measures and non trivial properties of the heat flow in Euclidean spaces Also discussed are interactions of this circle of ideas with linear programming and sampling algorithms including the solution of a question in online learning algorithms using a classical convexity construction

from the 19th century **History of Mathematics** Craig Smorynski, 2007-12-03 1 An Initial Assignment I haven't taught the history of mathematics that often but I do rather like the course The chief drawbacks to teaching it are that i it is a lot more work than teaching a regular mathematics course and ii in American colleges at least the students taking the course are not mathematics majors but education majors and and in the past I had found education majors to be somewhat weak and unmotivated The last time I taught the course however

the majority of the students were graduate education students working toward their master's degrees I decided to challenge them right from the start 1 Assignment In An Outline of Set Theory James Henle wrote about mathematics Every now and then it must pause to organize and reflect on what it is and where it comes from This happened in the sixth century B.C. when Euclid thought he had derived most of the mathematical results known at the time from five postulates Do a little research to find as many errors as possible in the second sentence and write a short essay on them The responses far exceeded my expectations To be sure some of the undergraduates found the assignment unclear I did not say how many errors they were supposed to find But many of the students put their hearts and souls 1 My apology to Prof Henle

at whose expense I previously had a little fun on this matter I used it again not because of any animosity I hold for him but because I was familiar with it and dealing with Euclid it seemed appropriate for the start of my course Cellular Automaton

Modeling of Biological Pattern Formation Andreas Deutsch, Sabine Dormann, 2007-12-26 This book focuses on a challenging application field of cellular automata pattern formation in biological systems such as the growth of microorganisms dynamics of cellular tissue and tumors and formation of pigment cell patterns These phenomena resulting from complex cellular interactions cannot be deduced solely from experimental analysis but can be more easily examined using mathematical models in particular cellular automaton models While there are various books treating cellular automaton modeling this interdisciplinary work is the first one covering biological applications The book is aimed at researchers practitioners and students in applied mathematics mathematical biology computational physics bioengineering and computer science interested in a cellular automaton approach to biological modeling **The New York Times Guide to Essential**
