Evolutionary Gerontology and Geriatrics Giacinto Libertini,Graziamaria Corbi,Valeria Conti,Olga Shubernetskaya,Nicola

Ferrara,2021-05-25 This book provides concrete scientific basis that we can conceive the possibility of modifying or even completely canceling aging process despite the fact that aging is commonly regarded as the result of the overall effects of many uncontrollable degenerative phenomena The authors illustrate in detail the mechanisms by which cells and the whole organism age Actions by which it is possible or will be possible within a limited time to operate for modifying aging are also debated The discussion is conducted within the frame and the concepts of evolutionary medicine which is also indispensable for distinguishing between the manifestations of aging and i diseases that worsen with age and ii acceleration of normal aging rates caused by unhealthy lifestyle habits and other avoidable factors The book also discusses the impact of aging on overall mortality and the strange situation that according to official statistics aging does not exist as cause of death This book is a turning point between a gerontology and geriatrics conceived as the study and vain treatment of an incurable condition and one in which these disciplines examine the how and why of a physiological phenomenon that can be modified up to a possible total control This means transforming the medical prevention and treatment of physiological aging from the greatest failure to the greatest success of medicine

The Hidden Relay Peter de Boer,2024-07-12 Reproduction and genetics are the central themes of biology They relate to big questions of life such as who are we where do we come from and where are we going In the combined science of reproductive genetics generations are interconnected and fertility plays a significant role The cell lineage responsible for this is known as the germline with gametes as the functional products and heralds of information The book follows the germline and attempts through a more liberal and narrative use of language to bridge the gap between an academic textbook and society Personal experiences are not shunned but do not dominate The book is intended for those professionally involved in or entering this field including those in education and journalism However it is also suitable for enthusiasts without a professional background partly thanks to its beautiful colour illustrations and an up to date glossary
